Education Recommendations

Currently a candidate for a Master's, bachelor's degree, or diploma in Computer Science, Engineering, or a related field with an accredited school in Canada.

Your responsibilities

As part of the team, you will:

- Develop scripts or applications (e.g. XML, Java, Java Script, Perl) to simulate various management activities and network scenarios.
- Develop and build network setups to facilitate feature development and testing.
- Develop and execute test plans to validate functional aspects of the product.
- Investigate product defects encountered during test scenarios.
- Ensure regular scheduling of automated regression tests, analyze automated test results, and maintain regression scripts, regression, and performance test beds.

Job Requirements

Your skills and experience

Required Skills for Internal Candidates:

- Strong programming skills (Java, Java Script, Perl, XML)
- Ability to learn quickly and to work in a fast-paced, innovative environment.
- Strong problem-resolution skills

It would be nice if you also had:

- UNIX operating environment (RHEL or Solaris), Virtual Machines, Kubernetes
- Knowledge of software and/or testing methodologies
- Networking and telecommunications knowledge
- Understanding of L2/L3 Services, Routing Protocols (ie. OSPF, IS-IS, BGP, RIP), and MPLS

Citizenship Requirement N/A
