Job Description Summary

GE Vernova Hitachi Nuclear Energy is looking to add a Quality Assurance student for a 12-month internship program starting in Summer 2026!

The need for clean energy is greater than ever. At GE Vernova Hitachi Nuclear Energy we are helping address climate change by designing technology to power our future with reliable, affordable, carbon-free energy. We are a world leader in advanced reactor technology, fuel, and services. Join us as we build on our legacy, boldly innovating to provide carbon-free power to the world.

We are a diverse and dedicated global team who believes in the value of your unique identity, background, and experiences. We are committed to fostering an inclusive culture, where everyone feels empowered to do their best work because they feel accepted, respected, and that they belong. By embracing diverse teams and perspectives, we are better equipped to build a world that works.

If you have a passion for technology and want a career in Quality Assurance, an internship with GE Vernova Hitachi Nuclear Energy will prepare you for an exciting career, tackling one of the world's toughest challenges of providing carbon-free power to the world. Various opportunities exist that include assignments designing, developing, improving, analyzing, and exposure to engineering concepts in hands-on, real-world situations.

Job Description

Essential Responsibilities:

As a Quality Assurance Intern, you will:

- Receive training, mentorship, and coaching from world-class technologists and experienced managers
 - Grow your expertise in your chosen field and expand your skills in new areas.
 - Experience challenging assignments in the power generation industry focusing on areas related to Nuclear Quality Assurance Program implementation for SMR projects.
 - Perform assessments of project quality assurance requirements to established GEH procedures and instructions
 - Develop project quality assurance plans
 - Conduct project quality oversight through the performance of quality surveillances.
 - Assess supplier capabilities and participate in supplier inspection activities
 - Apply engineering and Lean principles to continuous improvement projects with cross-functional organizations
 - Participate in regular team meetings to discuss ongoing projects, share insights, and contribute to problem solving discussions.
- Strong consideration will be given to Indigenous persons. The term Indigenous refers to individuals who identify as being descended from the original inhabitants (the first peoples) of what is now known as Canada. In this context, Indigenous people are First Nations, Métis and/or Inuit**
- *GE will only employ those who are legally authorized to work in Canada for this opening. This position requires access to and/or use of information subject to U.S. Export Control Laws, which mandate all citizenships be from the U.S. Department of Energy's List of Generally Authorized Countries (10 CFR Part 810 Appendix A); otherwise a specific authorization from the U.S. Department of Energy will be required. More information can be found here: <https://www.energy.gov/hnsa/10-cfr-part-810>.*
 - *You must have legal authorization to work in Canada and any offer of employment is conditioned upon the successful completion of a background investigation. The drug screen requirement in the background check process is not required if the role is based in Canada.*

GE Vernova's Nuclear Power business, through its joint venture with Hitachi Ltd., is a world-leading provider of nuclear fuel bundles, services, and advanced nuclear reactor designs. Technologies include boiling water reactors and small modular reactors, such as the BWRX-300, which is one of the simplest, yet most innovative boiling water reactor designs.

About GE Vernova

GE Vernova is a planned, purpose-built global energy company that includes Power, Wind, and Electrification segments and is supported by its accelerator businesses of Advanced Research, Consulting Services, and Financial Services. Building on over 130 years of experience tackling the world's challenges, GE Vernova is uniquely positioned to help lead the energy transition by continuing to electrify the world while simultaneously working to decarbonize it. GE Vernova helps customers power economies and deliver electricity that is vital to health, safety, security, and improved quality of life. GE Vernova is headquartered in Cambridge, Massachusetts, U.S., with more than 80,000 employees across 140+ countries around the world.

GE Vernova's **Nuclear Power** business, through its joint venture with Hitachi, is a world-leading provider of nuclear fuel bundles, services, and advanced nuclear reactor designs.
