EDUCATIONAL RECOMMENDATIONS

Currently a candidate for diploma, bachelor's or master's degree in network technology, Computer/Software/Electrical/Telecommunications Engineering, Computer Science, or related field with an accredited school in Canada.

Your responsibilities

What you will do:

- Acquire a deep understanding of how IP/MPLS networks are built, from small enterprises to the largest Service Providers.
- Obtain hands-on experience on the industry-leading 7x50 Service Routers - #1 in Global Edge Routing and #2 in Global Total Routing.
- Have free access to the Nokia Service Routing Certification (SRC) Program.
- Develop enhanced techniques in the troubleshooting and reproduction of real-world issues.

- Experience teamwork in a fast-paced environment and get exposure to Customer Issue Management.

More information

Some of our benefits for students in Canada:

- Flexible and hybrid working schemes to balance work and life
- Professional development events and networking opportunities
- Campus perks designed to make your student experience enjoyable and social, such as access to an onsite cafeteria, free employee parking, complimentary fitness centre, and sports facilities (volleyball, basketball, pickleball courts, ping pong, and employee leagues)
- Well-being programs, including Personal Support Service 24/7 - a confidential support channel open to all Nokia employees and their families in challenging situations
- Opportunities to join Nokia Employee Resource Groups (NERGs) and connect with people who share your passions and values
- Employee Growth Solutions, mentorship programs, and coaching support for your career development
- A learning environment that fosters both personal growth and professional development - for your role and beyond

Disclaimer for US/Canada

Nokia maintains broad annual base salary ranges for its roles in order to account for variations in knowledge, skills, experience and market conditions, and with consideration to internal peer equity. Check the salary ranges in the job info section for this role.

All North America job posts will post for a minimum of 3 calendar days and up to 180 days or until candidate/s identified.

About Us

Advancing connectivity to secure a brighter world.

Nokia is a global leader in connectivity for the AI era. With expertise across fixed, mobile and transport networks, powered by the innovation of Nokia Bell Labs, we're advancing connectivity to secure a brighter world.

About the Business Group

A robust digital backbone is the unsung hero of modern life, underpinning everything from daily interactions to cloud computing and critical infrastructure. The Network Infrastructure team is passionate about pushing the boundaries of what's possible in networking, tackling the toughest challenges and delivering innovative solutions.

We deliver trusted, purpose-built IP, optical, fixed, and data center solutions that power the internet, drive the global economy, and support the mission-critical industries that keep the world running.

Our recruitment process

We act inclusively and respect the uniqueness of people. Our employment decisions are made regardless of race, color, national or ethnic origin, religion, gender, sexual orientation, gender identity or expression, age, marital status, disability, protected veteran status or other characteristics protected by law. We are committed to a culture of inclusion built upon our core value of respect.

If you're interested in this role but don't meet every listed requirement, we still encourage you to apply. Unique backgrounds, perspectives, and experiences enrich our teams, and you may be just the right candidate for this or another opportunity.

The length of the recruitment process may vary depending on the specific role's requirements. We strive to ensure a smooth and inclusive experience for all candidates. Discover more about the recruitment process at Nokia.

Job Requirements

Your skills and experience

You have:

- An interest in working with the industry-leading 7x50 series of carrier-grade service routers, learning how IP/MPLS networks are built, and how the Internet works.
- Critical thinking, troubleshooting and problem-solving skills.
- Attention to details and excellent communication skills to provide written and verbal explanations to internal Nokia teams as well as external customers.
- Strong organizational and time-management abilities, with a knack for prioritizing tasks effectively.

It would be nice if you also have:

- Knowledge of IP/MPLS and routing protocols such as OSPF, IS-IS, BGP, MPLS, etc.
- Experience in IP network troubleshooting techniques.
- Proficiency in Linux/Unix environment, including Bash scripting and Python programming.

Citizenship Requirement N/A
