| Job Description | |

At Broadridge, we've built a culture where the highest goal is to empower others to accomplish more. If you're passionate about developing your career, while helping others along the way, come join the Broadridge team.

The Software Engineer Intern will embark on an exciting journey to contribute to modernization projects, including Generative AI development and Cloud Migration. This role offers a unique opportunity to be part of a dynamic team, creating innovative solutions and gaining valuable insights into the financial industry. As a Software Engineer Intern, you will collaborate closely with experienced team members to drive software development projects. Your responsibilities will encompass requirement analysis, coding, testing, and documentation. Additionally, you will have the chance to engage in transformative projects, allowing you to make a meaningful impact on our technological landscape.

Summer Internship: May 2026 - August 2026

Key Job Functions/Responsibilities

- Actively participate in the development of AI applications, leveraging your skills in Typescript, React.js and AWS.
- Proactively use AI tools to accelerate the software development lifecycle in an Agile environment.
- Engage in research initiatives to support the development team in overcoming challenges and exploring new technologies.
- Partner with our business team to analyze software requirements and contribute to tailored solutions.
- Take ownership of technical documentation, ensuring it remains up-to-date and reflects the latest project developments.
- Provide regular and timely updates to the management, keeping all stakeholders informed of progress and potential roadblocks.

Job Requirements

Basic Skill Level Requirements

Education:

- Enrolled in year 2 or higher of an undergraduate program in Computer Science, Software Engineering, or Computer Engineering.

Experience:

- Strong Programming Proficiency in Typescript and React.js, with a proven track record of successful full-stack projects.
- Solid experience in Web Development, including proficiency in HTML, JavaScript, and CSS.
- Solid working knowledge of both relational and NoSQL databases.
- Familiarity with industry-standard development tools, including VS Code and Git.
- Proficiency in AWS, Java and REST API will be an asset.
- Exceptional analytical, communication, and documentation skills.
- Ability to tackle project assignments with enthusiasm and attention to detail.
- Thrive in a fast-paced and dynamic environment, consistently delivering high-quality solutions that meet or exceed expectations.

Citizenship Requirement N/A
