## **Who we are:**

Geotab ® is a global leader in IoT and connected transportation and certified "Great Place to Work™." We are a company of diverse and talented individuals who work together to help businesses grow and succeed, and increase the safety and sustainability of our communities.

Geotab is advancing security, connecting commercial vehicles to the internet and providing web-based analytics to help customers better manage their fleets. Geotab's open platform and Geotab Marketplace ®, offering hundreds of third-party solution options, allows both small and large businesses to automate operations by integrating vehicle data with their other data assets. Processing billions of data points a day, Geotab leverages data analytics and machine learning to improve productivity, optimize fleets through the reduction of fuel consumption, enhance driver safety and achieve strong compliance to regulatory changes.

Our team is growing and we're looking for people who follow their passion, think differently and want to make an impact. Ours is a fast paced, ever changing environment. Geotabbers accept that challenge and are willing to take on new tasks and activities - ones

that may not always be described in the initial job description. Join us for a fulfilling career with opportunities to innovate, great benefits, and our fun and inclusive work culture. Reach your full potential with Geotab. To see what it's like to be a Geotabber, check out our blog and follow us @InsideGeotab on Instagram. Join our talent network to learn more about job opportunities and company news.

## Who you are:

We are looking for amazing talent who can contribute to our growth and deliver results! Geotab is seeking a Data Platform Developer Intern who will immediately contribute to the organization and the Data and Analytics team efforts. If you love technology, are well organized, have great communication skills and are keen to join an industry leader - we would love to hear from you!

## What you'll do:

As a Data Platform Developer Intern, your key area of responsibility will be to develop and maintain new data infrastructure platforms that manage the data ingestion process of Geotab's internal data lake. Your day-to-day may include creating processes, implementing logging, monitoring, and alerting services, working with data scientists to understand data processing needs and develop infrastructure solutions to support these initiatives, creating and maintaining documentation for architecture, requirements, and process flows, supporting internal Geotab teams to assist with data integration with newly developed big data platforms. You will need to work closely with members of the Data Platform, Data Science, and MyGeotab teams. To be successful in this role you will need to be a motivated individual with strong written and verbal communication skills, and have the ability to quickly understand complex, technical concepts. In addition, the successful candidate will design robust and scalable solutions while being able to manage multiple projects and priorities to ensure timely results.

## The opportunity:

- 8 month work-term beginning May 2026.
- Full-time, paid internship: Monday - Friday, 37.5hrs/week.
- Your first week at Geotab begins with 'GEO Launch' - a one-week Employee Orientation. [Click here](#) to learn more!
- Learn more about the Geotab Campus Program [here](#).

## How you'll make an impact:

- Develop and maintain new data infrastructure platforms managing data ingestion, digestion, and stream processing of Geotab's internal data lake.
- Develop processes to enrich Geotab's big data with telematics data at scale.
- Develop processes and implement logging, monitoring, and alerting services to ensure the health of Geotab's big data infrastructure.
- Work with data scientists to understand data processing needs and develop infrastructure solutions to support these initiatives.
- Create and maintain documentation for architecture, requirements, and process flows.
- Support internal Geotab teams with data integration for newly developed big data platforms.

### Job Requirements

## What you'll bring to the role:

- Pursuing a Degree/Diploma in Computer Science, Math, Software Engineering or a related field.
- Experience in Data Engineering or a similar role.
- Experience using JavaScript, Java, Python, or C#.
- Knowledge of application containerization tools like Docker and Kubernetes is a strong plus.
- Familiarity with Linux/Unix OS and shell/command languages is preferred.
- Understanding of data management fundamentals and data storage principles.
- Experience with API design and implementation.
- Familiarity with Big Data environments, such as Compute Engine and Google BigQuery.

- Excellent oral and written communication skills.
- Strong analytical skills with the ability to make well-judged decisions.
- Highly organized with the ability to manage multiple tasks and projects simultaneously.
- Strong team player with the ability to engage at all organizational levels.
- Entrepreneurial mindset and comfort in a flat organizational structure.

**Citizenship Requirement**      N/A
