<b>Job Description</b>	

### **Who we are:**

Reliable Controls is dedicated to reducing the carbon footprint of buildings around the world. Our team specializes in the design, development, and assembly of building automation controls and software programs.

We align ourselves with the right people and empower them in the right ways. An established company based in Victoria, BC, we nurture a strong culture of communication, trust, and collaboration. Embracing a work-life balance, promoting continuous learning, and celebrating our achievements are a few of the ways we show our enduring commitment to employees. Let's combine our passions for building a greener future!

### **Your mission:**

To ensure quality is ingrained in our software products from the very start. You will work alongside our software QA department to perform various tests of our hardware and software products.

### **What we offer:**

- Free parking at both of our Victoria locations,
- Green Transportation Incentive - bus, bike or walk to work and earn extra money for it!
- Social Committee Events - games nights, cabin trips, bowling, camping and more,
- ...and most importantly, a genuinely great culture fostered by the senior management team and sustained by fantastic people!

### **What we hope to create:**

Solutions for building operators to enable the vision of [Net-Zero Emissions by 2050](#). Help us get there.

**In this role you will:**

- Execute test plans for our hardware, and software products
- Record test results and issues found using our testing and bug tracking software
- Troubleshoot to verify and diagnose cause of issues
- Verify functional requirements
- Verify resolved bugs

**You'll have access to:**

- An onboarding package to get you up to speed
- Online training courses
- A mentor

**Let's connect!**

At Reliable Controls it's not only experience and skills we are seeking; alignment with our values is of the utmost importance to us. Continuous improvement is vital to our organization, and we are prepared to invest in our team's future, not just their current abilities. Let's connect. We would love to hear from you!

## **Job Requirements**

**This role might be right for you if you have/are:**

- A Computer Science, Software or Computer Engineering degree
- Testing experience with embedded products and software
- Familiar with test management and documentation systems (TMS)
- Hands-on experience with electrical devices and measurement instruments
- Familiarity with serial and Ethernet communication protocols
- Excellent general computer and IT skills;
- Quality-driven personality
- Great attention to detail
- Strong desire to be part of a team that produces high-quality applications
- Excellent communication and interpersonal skills.

**You'll be successful in this position if you:**

- Are an enthusiastic, innovative individual who cares about sustainability
- Look for ways to have a meaningful impact on your team's work
- Are interested in using devices to control the physical environment, and you're willing to learn our products and industry
- Like a challenge and want to grow professionally
- Are patient and diligent; quality may take longer, but you know it's worth it
- Value a healthy work-life balance; we don't expect you to work overtime or weekends

**Citizenship Requirement**                    N/A
