Job Description	

Who we are:

Geotab ® is a global leader in IoT and connected transportation and certified "Great Place to Work™." We are a company of diverse and talented individuals who work together to help businesses grow and succeed, and increase the safety and sustainability of our communities.

Geotab is advancing security, connecting commercial vehicles to the internet and providing web-based analytics to help customers better manage their fleets. Geotab's open platform and Geotab Marketplace ®, offering hundreds of third-party solution options, allows both small and large businesses to automate operations by integrating vehicle data with their other data assets. Processing billions of data points a day, Geotab leverages data analytics and machine learning to improve productivity, optimize fleets through the reduction of fuel consumption, enhance driver safety and achieve strong compliance to regulatory changes.

Our team is growing and we're looking for people who follow their passion, think differently and want to make an impact. Ours is a fast paced, ever changing environment. Geotabbers accept that challenge and are willing to take on new tasks and activities - ones

that may not always be described in the initial job description. Join us for a fulfilling career with opportunities to innovate, great benefits, and our fun and inclusive work culture. Reach your full potential with Geotab. To see what it's like to be a Geotabber, check out our blog and follow us @InsideGeotab on Instagram. Join our talent network to learn more about job opportunities and company news.

Who you are:

The Solutions Engineering Intern is responsible to develop solutions and documentation to support department initiatives. These solutions may require the development of tools and/or processes, technical project or program management, data mining and analysis, etc. The Solutions Engineering Intern will work closely with the Solutions Engineering teams and management, as well as communicate with other product or engineering departments as needed.

What you'll do:

To be successful in this role you will be a self-starter with strong written and verbal communication skills, and have the ability to quickly understand technical concepts. In addition, the successful candidate will have strong analytical and project management skills with an ability to identify needs, develop effective solutions and manage projects through to completion. The successful candidate will also be able to manage multiple timelines and contrasting priorities to ensure timely results.

The opportunity:

- 4 month work-term beginning May 2026.
- Full-time, paid internship: Monday - Friday, 37.5hrs/week.
- Your first week at Geotab begins with 'GEO Launch' - a one-week Employee Orientation. [Click here](#) to learn more!
- Learn more about the Geotab Campus Program [here](#).
- This posting is for an existing vacancy.

How you'll make an impact:

- Collaborate with the Solutions Engineering team to design and develop solutions that leverage Geotab's ecosystem to our customer's challenges. This includes creating proof-of-concept models, identifying key features and assessing potential impacts to customer requirements.
- Support and maintain team solutions through further development, documentation or cross-team training.
- Provide technical project management support as needed for team projects. Prepare accurate and concise technical documentation, reports, and presentations related to sustainability initiatives and solution development. Communicate project progress, challenges, and outcomes to relevant stakeholders.
- Assist in the coordination and execution of projects, including data collection, performance monitoring, and analysis. Collaborate with cross-functional teams to ensure project milestones are achieved within established timelines.
- Stay informed about emerging trends, technologies, and industry standards. Identify opportunities for improvement in Geotab's ecosystem and propose innovative alternatives.

Job Requirements

What you'll bring to the role:

- 1+ years experience with data science tools, SQL (Google Big Query preferred).
- Familiarity with programming languages such as Python, JS, HTML, React.
- Familiarity with API integrations, some ability to develop, maintain and/or troubleshoot issues.
- Strong analytical skills with the ability to problem-solve to well-judged decisions.
- Strong aptitude for understanding technical and business requirements. Ability to understand reasoning for project requirements.
- High accuracy and meticulous attention to detail.
- Able to work well under pressure and respond to fast changing priorities and deadlines.
- Strong project management skills; able to identify needs, develop effective solutions and manage projects through to completion.
- Strong communication and interpersonal skills to collaborate with cross-functional teams and effectively communicate technical

concepts to both technical and non-technical stakeholders.

- Willingness to learn and a strong work ethic and passion for technology and innovation.
- Self-motivated and able to work independently as well as part of a team.
- Prior experience or exposure to telematics, connected vehicle technology, or related fields is a plus.

Citizenship Requirement N/A
