### **COMPANY PROFILE**

Fraser Health is responsible for the delivery of hospital and community-based health services to over 1.9 million people in 20 diverse communities from Burnaby to Fraser Canyon on the traditional, ancestral and unceded territories of the Coast Salish and Nlaka'pamux Nations, and is home to six Métis Chartered Communities. Our team of 45,000 staff, medical staff and volunteers is dedicated to serving our patients, families and communities to deliver on our vision: Better health, best in health care.

Fraser Health has 12 acute care hospitals, BC's first start-of-the-art outpatient care and surgery centre, and a wide range of services in public health, primary care, home health, mental health, long-term care and community care - all within Metro Vancouver and the Fraser Valley. Known as one of the most desirable place to live in the world, these vibrant communities along with inspiring scenery and easy access to an abundance of outdoor activities provide an amazing quality of life.

We are proud of the innovation, dedication, teamwork and tenacity of our physicians, nurses, and other employees and volunteers. More than any building or technology, it's our people who make Fraser Health distinct.

### **POSITION OVERVIEW**

We are currently seeking to fill two Data Analyst Co-op positions for The Centre for Advanced Analytics, Data Science and Innovation (CAADSI). If you are passionate about turning data into actionable insights, and motivated to find a role where you can truly make a difference to the quality of healthcare delivery and patient care, this opportunity is for you.

**Main responsibilities include:**

- Perform complex data mining across multiple electronic health systems and data sources, analyze and interpret results to provide evidence-based insights on service utilization, health interventions, technology assessments and performance reviews,
- Plan and develop dynamic business intelligence (BI) reports for CAADSI clients through clinical, financial, human resource, and operational data,
- Apply knowledge in performance measurement and benchmarking methodologies to develop automated data products,
- Support the creation of strategic business cases and supporting documentation, data dictionaries, briefing papers, and reports across multiple clinical areas and portfolios,
- Prepare data and reports for Fraser Health Executive Team, Board of Directors and other stakeholders, and
- Work collaboratively with colleagues, senior management, and staff of various organizational units both internal and external to the Fraser Health organization.

Location: Suite 400-13450 102nd Avenue, Surrey, BC V3T 0H1

### **Job Requirements**

#### **QUALIFICATIONS AND EXPERIENCE**

The ideal candidate will be either a 3rd or 4th-year student pursuing a bachelor's degree, or a student pursuing a Master's degree in Healthcare Analytics, Data Science or other related discipline. Candidates should be expert with T-SQL, have a proficiency with mainstream BI development tools (e.g., PowerBI, Tableau, or MicroStrategy), and have a working knowledge of a programming language such as Python, R, or VBA.

**Citizenship Requirement**                    N/A
