Job Description

We are hiring a Student GIS Technician to support our GIS team with practical, data-focused geospatial work over a 4-8-month term. This opportunity is intended for a current post-secondary student who is looking to apply GIS skills in a professional environment. The role focuses on data collection, organization, and spatial processing in support of active project work.

This position is part of our Early Careers Program, which offers students structured experience, technical mentorship, and exposure to professional tools and workflows in a collaborative setting.

Ledcor's early careers program strives to create a close-knit community of students, apprentices, and new grads in virtual and in-person environments. At Ledcor, you are part of much more than just gaining work experience. It's about building long-lasting connections with others at all career levels. We want to help you on your journey of self-discovery and support you in getting one step closer to your dream career. Join Ledcor's early careers program to gain new knowledge, make your contribution to the team and enjoy yourself while doing it.

Join our Ledcor Technical Services team in Vancouver, BC

Responsibilities:

- Collect, compile, and organize spatial and tabular data from various internal and external sources
- Support data validation, cleaning, transformation, and preparation tasks
- Maintain and update project-related datasets, including structured documentation of data sources and workflows
- Conduct spatial analysis (e.g., overlays, proximity checks, data summaries) using ArcGIS tools
- Assist with field data collection workflows using:
 - ArcGIS Field Maps - a mobile app for map-based field data collection
 - Survey123 - a form-based data collection tool for mobile and web
- Collaborate with GIS and project team members to support data needs and resolve data-related issues
- Provide customer service to internal business users by responding to geospatial data requests and technical inquiries
- Contribute to general documentation for internal processes, data procedures, and technical reference
- Other duties as required

Job Requirements

- Currently enrolled in a diploma, undergraduate, or graduate program with coursework in GIS, geography, geomatics, environmental science, planning, computer science, or a related field
- Academic experience using Esri ArcGIS tools, particularly ArcGIS Pro
- Strong attention to detail and ability to follow technical workflows
- Clear communication skills and ability to work collaboratively in a team environment
- Familiarity with Microsoft Excel and basic spatial data handling

Citizenship Requirement N/A

Position Start Date May 04, 2026 12:00 AM
