Salary Currency	CAD
Salary	0.0 per hour for 40 Major List
Salary Range \$	\$26 - \$28 per hour
Job Description	

At Kabam, we're constantly raising the bar of excellence in free-to-play gaming. We hire for passion and diversity so that we can triumph in our collective skill. Our teams are made up of a fusion of personalities and interests bound together by a collaborative nature, fun-loving culture, and a drive to do what it takes to make great games. And this is where you come in...

We're looking for a Game Data Analyst Co-op to join our team! Reporting to the Senior Game Data Analyst for Marvel Contest of Champions, you'll gain immersive, hands-on experience analyzing the live performance, feature performance, and player

behavior of one of Marvel's most popular mobile games. This role demands a scientific, results-driven approach to transform large datasets into actionable strategic insights.

If you're passionate about data, games, and applying a rigorous analytical approach to inform strategy, we want to hear from you!

In this role, you can expect to:

Insight Generation & Partnership (Cross-functional Impact)

- Collaborate closely with Product, Design and Marketing teams to translate their business objectives into measurable data questions

- Conduct hands-on exploratory data analysis (EDA) to uncover trends, anomalies, and key drivers behind in-game metrics.
- Present findings and insights clearly and concisely to stakeholders
- Review reporting processes and suggest enhancements to resolve inefficiencies.

Data Extraction and Preparation (Foundational Skills)

- Utilize SQL querying, extracting and manipulating complex datasets from production and analytical data warehouses and other applicable sources.
- Assist in refining and optimizing existing data queries to improve efficiency and accuracy.

Reporting and Visualization (Stakeholder Support)

- Maintain and ensure accuracy of existing analytical dashboards (potentially in Tableau, Looker, Power BI) tailored to various team needs within the organization.

- Develop ad-hoc reports quickly to address immediate, high priority business questions from leadership.
- Propose and implement enhancement to current reporting processes to resolve inefficiencies and increase adoptions
- Ensure that dashboards and reports are up-to-date and accurate.

Product Feature Analysis and Optimization (Direct Impact)

- Execute post-launch analysis on newly released in-game features, events, or products.
- Measure feature success against pre-defined Key Performance Indicators (KPIs) and recommend data-backed optimization paths.

Job Requirements

Currently enrolled in a qualifying Co-Ops program, preferably within a STEM discipline (e.g. Statistics, Computer Science, Engineering)

Key Skills

- SQL: Practical experience writing queries for data extraction and manipulation
- Data Presentation: Demonstrated ability to synthesize complex analytical results into clear, concise and visually effective presentation.
- Gaming Acumen: Familiarity with general game design concepts and monetization principles in the mobile F2P (Free-to-Play) space.
- BI Tools: Exposure to visualization tools such as Tableau, Looker, Power BI is a bonus

Citizenship Requirement N/A
