## Description

*Summer Internship 2026 / Organizational Performance / Location: Quebec City or Montreal - Hybrid / Power BI*

### Build the future with us

Are you driven by data analysis, business intelligence, and continuous improvement and eager to contribute to the purpose of a company that aims to help its clients feel confident and secure about their future? As a **Business Intelligence (BI) Intern**, you will play a key role in implementing the integrated Lean performance strategy by leveraging process optimization, problem-solving, and business intelligence to support decision-making and continuous improvement.

This position is a great opportunity to showcase your skills and fully realize your potential within a caring and trustworthy company. Here, people and their development are at the heart of our priorities, fostering an environment that encourages collaboration and innovation.

#### **What you will accomplish with us**

As a **Business Intelligence (BI) Intern**, you will be at the core of our mission. Your main responsibilities will include:

- Deploying strategic dashboards by integrating best practices in data visualization to support strategic decision-making.
- Developing and implementing key performance indicators (KPIs) to monitor operational effectiveness using tools such as Power BI.
- Preparing clear and concise performance reports for presentation to the executive committee, ensuring continuous and transparent communication.
- Collaborating on the implementation and management of a control tower (strategic obeya) to centralize performance monitoring and facilitate cross-departmental coordination.
- Supporting the organizational performance team in aligning performance objectives with corporate strategies.
- Tracking and evaluating the impact of performance initiatives using leading and lagging indicators to measure outcomes and efforts.
- Leveraging business intelligence to transform data into actionable insights, enabling informed and proactive decision-making.

#### **Why you will love working with us**

- A work environment where learning and development merge with a collective pursuit of excellence.
- A healthy, safe, fair, and inclusive environment where potential can be freely expressed and developed.
- The possibility to work in a hybrid environment supported by flexibility and access to inspiring, innovative workspaces.
- Student benefits: Access to internal training, mentoring, involvement in real projects, flexible schedules adapted to studies, and a rewarding experience for your professional journey.

### **Job Requirements**

#### **What will help you succeed in this role**

We are looking for someone who:

- Is currently pursuing a bachelor's degree in Business Administration (IT, IS), Computer Engineering, or a related field.
- Is recognized for strong proficiency in data visualization tools, particularly Power BI, including knowledge of data governance, security, and performance principles, as well as solid ETL skills.
- Has an intermediate level of English, as the role requires regular verbal and written communication with English-only internal partners.
- Stands out for strong analytical and data-interpretation skills.
- Demonstrates autonomy, curiosity, initiative, and the ability to work proactively.
- Is known for excellent communication skills and the ability to collaborate effectively with stakeholders at all levels.

**Citizenship Requirement**                    N/A

### **APPLICATION INFORMATION**

**Application Procedure**                    Through Employer Website
