<b>Job Location</b>	Vancouver, BC
<b>Country</b>	Canada
<b>Duration</b>	4 months
<b>Work Mode</b>	Fully Remote
<b>Salary Currency</b>	CAD
<b>Salary</b>	48.0 per hour for 40 Major List
<b>Job Description</b>	

Apollo.io is one of the fastest-growing SaaS companies in North America, trusted by over 500,000 companies worldwide. Our platform helps sales and marketing teams find the right prospects and grow revenue through data and automation.

We're a product-driven, engineering-first culture where you'll work on challenging problems at scale, learn modern technologies, and make a real impact.

### Role Overview

As a Backend Engineering Co-Op at Apollo.io, you'll gain hands-on experience working on real product features in a fast-paced startup environment. You'll collaborate with engineers, designers, and product managers to build and improve the systems that power Apollo.

This role is designed for students looking to apply classroom knowledge to practical problems while learning modern engineering practices at scale. Many of our co-ops contribute production code in their first few weeks.

### What You'll Do

- Contribute to backend development tasks (feature building, bug fixing, testing, and scaling).
- Work with databases, APIs, and backend services that support millions of users.
- Collaborate with senior engineers in code reviews, design discussions, and team standups.
- Learn how to design, build, and maintain reliable, high-performance distributed systems.
- Gain exposure to our modern tech stack: Ruby on Rails, Node.js, MongoDB, Redis, Kubernetes, Docker.

### Why Apollo.io?

- Impactful Work: You'll work on real features used by thousands of customers-not side projects.
- Learning Environment: Hands-on mentorship from experienced engineers who care about your growth.
- Startup Energy: Fast-moving, innovative culture where new ideas are encouraged.

## **Job Requirements**

### **What We're Looking For**

- Currently enrolled in a Computer Science, Software Engineering, or related program.
- Solid understanding of at least one programming language (e.g., Python, Java, Ruby, JavaScript).
- Interest in backend development, APIs, and distributed systems.
- Strong problem-solving and communication skills.
- Curiosity, adaptability, and a collaborative mindset.

### **Nice to Have**

- Familiarity with databases (SQL or NoSQL).
- Exposure to cloud platforms (AWS, GCP) or containerization (Docker, Kubernetes).
- Previous co-op, internship, or project experience in software development.

**Citizenship Requirement**      Canadian Citizens Preferred

## **APPLICATION INFORMATION**

**Application Procedure**      Through UBC Science Co-op

**Cover Letter Required?**      No

### **Special Application Instructions**

Please include a link to your GitHub or LinkedIn profile in your application, if available.
