<b>Job Description</b>	

DataVisor is the world's leading AI-powered Fraud and Risk Platform that delivers the best overall detection coverage in industry. With an open SaaS platform that supports easy consolidation and enrichment of any data, DataVisor's solution scales infinitely and enables organizations to act on fast-evolving fraud and money laundering activities in real time. Its patented unsupervised machine learning technology, advanced device intelligence, powerful decision engine and investigation tools work together to provide guaranteed performance lift from day one. DataVisor's platform is architected to support multiple use cases across different business units flexibly, dramatically lowering total cost of ownership, compared to legacy point solutions. DataVisor is recognized as an industry leader and has been adopted by many Fortune 500 companies across the globe.

Our award-winning software platform is powered by a team of world-class experts in big data, machine learning, security, and scalable infrastructure. Our culture is open, positive, collaborative, and results driven. Come join us!

#### **Responsibilities:**

- Work under the direction of mentors to test state-of-the-art product
- Design and develop robust automated test scripts based on the QA team's manual test cases.
- Implement UI tests using selenium to ensure our applications' user interface meets our quality standards.
- Develop API tests to validate the functionality, reliability, performance, and security of our APIs using tools like Postman, Cucumber etc..
- Work closely with the QA team to understand the test requirements and convert manual test cases into automated scripts.
- Continuously improve and expand our automation test framework to enhance test execution speed, scalability, and reliability.
- Identify, record, document thoroughly, and track bugs through to resolution.
- Stay up-to-date with new testing tools and test strategies, and integrate them into the test process where beneficial.
- Provide detailed reports and metrics on test execution, coverage, and areas for improvement to the QA and development teams.

#### **Benefits**

- Hands-on experience in a dynamic and collaborative work environment.

- Opportunity to work closely with experienced professionals in the field.
- Exposure to real-world software testing scenarios.
- Competitive hourly rate, range 20-25 CAD per hour.

### **Job Requirements**

#### **Requirements**

- Current college or graduate student majoring in Computer Science or a related field, graduate in 2026
