About Us

Named #4 startup in Canada for 2024, Hiive is a fintech/marketplace startup connecting buyers and sellers of stock in venture-backed pre-IPO companies?. Thanks to our industry-leading technology and best-in-class capital markets team, we are home to the fastest-growing marketplace for the stock of "unicorns" on the planet. As a profitable and rapidly growing business backed by tier-one venture capital investors, we are seeking to scale our high-performing team.

Our **Emerging Talents Program** is designed to provide aspiring engineers with hands-on experience, mentorship, and real-world projects that make a difference. If you're passionate about coding, building products, problem-solving, and working in a fast-paced environment, this is the opportunity for you!

As a **Software Engineering Intern**, you will be at the core of building and improving our technology stack, contributing directly to the systems that power our platform. You will work alongside experienced engineers to develop new features, enhance system

performance, and solve complex technical challenges. Whether it's optimizing backend services, refining front-end experiences, or working with infrastructure, your contributions will have a real impact on our business.

In this role, your responsibilities would include:

- Contribute to the development of new features, services, and applications.
- Work with modern technologies such as **TypeScript**, **React** and **Elixir**.
- **Debug**, **test**, and optimize code to improve system performance.
- **Collaborate** with product managers, designers, and senior engineers to bring ideas to life.
- Participate in code reviews, team stand-ups, and engineering discussions.
- Work on a capstone project that will be presented to the leadership team at the end of your internship.

What You'll Gain

- Hands-on experience working on real-world projects.
- One-on-one mentorship from experienced engineers.
- Exposure to modern tech stacks and best practices.
- Networking opportunities and career development sessions.
- Potential for a full-time role after graduation.

Job Requirements

What We're Looking For

- Currently pursuing a degree in Computer Science, Software Engineering, or a related field.
- Strong foundation in at least one programming language (e.g., **Python**, **TypeScript**, **Java**, etc.), with preference for experience in a functional language. We use **Elixir** and **TypeScript**.
- Understanding of software development concepts, **data structures**, and **version control**.
- Familiarity with **web development**, **databases**, or **cloud services** is a plus.
- Passion for technology, startups, and building impactful products.
- Ability to thrive in a collaborative and fast-paced environment.

Citizenship Requirement N/A
