<b>Job Description</b>	

**Job ID:** R-23789

Join us in pioneering breakthroughs in healthcare. For everyone. Everywhere. Sustainably.

Our inspiring and caring environment forms a global community that celebrates diversity and individuality. We encourage you to step beyond your comfort zone, offering resources and flexibility to foster your professional and personal growth, all while valuing your unique contributions.

Acquires further qualification for a Bachelor's degree, and gathers respective working experience in different technical fields of expertise, in the course of a respective assignment.

**Do you want to join us in helping to fight the world's most threatening diseases and enabling access to care for more people around the world? At Siemens Healthineers, we pioneer breakthroughs in healthcare. For everyone. Everywhere. At Siemens Healthineers, we offer you a flexible and dynamic environment with opportunities to go beyond your comfort zone in order to grow personally and professionally. Sound interesting? Then come and join our global team as a Software Developer Co-op to build a world class Oncology specific EMR and Treatment Management System that will be used to treat patients here in Canada as well as every other part of the world.**

**This is a role well suited for a highly motivated student looking to build their skill set and gain hands-on experience. As a Software Developer Co-op, you will be responsible for:**

- You will play a key role in analyzing, designing, developing, and documenting software enhancements for Oncology focused products using modern development technologies such as .NET Core, C#, Java, Typescript, Angular, HTML, CSS, RESTful web services, SQL Server, etc.
- You will be involved in conducting and participating in design and code reviews, unit, feature, and regression testing, and will

collaborate with software development teams and other departments worldwide on developing application solutions.

- You will use your analytical and proactive mind set and feel comfortable working on complex problems. You will work with talented people in a multicultural working environment and will bring the best in quality and value every.
- You'll join a cross functional team in building a world class Oncology specific EMR and Treatment Management System that will be used to treat patients here in Canada as well as every other part of the world. Siemens Healthineers contributes to the fight against cancer in over 100 countries across the globe.

**This position may suit you best if you are familiar with the areas and concepts below, and would like to develop your skills within Healthineers:**

- Developing software systems.
- Software testing procedures.
- Performing meaningful peer code reviews.

**Who we are:** We are a team of more than 73,000 highly dedicated Healthineers in more than 70 countries. As a leader in medical technology, we constantly push the boundaries to create better outcomes and experiences for patients, no matter where they live or what health issues they are facing. Our portfolio is crucial for clinical decision-making and treatment pathways.

**How we work:** When you join Siemens Healthineers, you become one in a global team of scientists, clinicians, developers, researchers, professionals, and skilled specialists, who believe in each individual's potential to contribute with diverse ideas. We are from different backgrounds, cultures, religions, political and/or sexual orientations, and work together, to fight the world's most threatening diseases and enable access to care, united by one purpose: to pioneer breakthroughs in healthcare. For everyone. Everywhere. Sustainably.
