Job Description	

Who we are:

Geotab ® is a global leader in IoT and connected transportation and certified "Great Place to Work™." We are a company of diverse and talented individuals who work together to help businesses grow and succeed, and increase the safety and sustainability of our communities.

Geotab is advancing security, connecting commercial vehicles to the internet and providing web-based analytics to help customers better manage their fleets. Geotab's open platform and Geotab Marketplace ®, offering hundreds of third-party solution options, allows both small and large businesses to automate operations by integrating vehicle data with their other data assets. Processing billions of data points a day, Geotab leverages data analytics and machine learning to improve productivity, optimize fleets through the reduction of fuel consumption, enhance driver safety and achieve strong compliance to regulatory changes.

Our team is growing and we're looking for people who follow their passion, think differently and want to make an impact. Ours is a fast paced, ever changing environment. Geotabbers accept that challenge and are willing to take on new tasks and activities - ones that may not always be described in the initial job description. Join us for a fulfilling career with opportunities to innovate, great benefits, and our fun and inclusive work culture. Reach your full potential with Geotab. To see what it's like to be a Geotabby, check out our blog and follow us @InsideGeotab on Instagram. Join our talent network to learn more about job opportunities and company news.

Who you are:

The Software Developer Intern will be part of a team who builds a state of the art telematics platform that makes sense of the data collected by custom-built hardware. This position will involve writing high-performance C# code and SQL queries to process and store this information in real-time. This position writes JavaScript and TypeScript code to create fast and responsive user interfaces.

What you'll do:

As a Software Developer Intern on our team, you'll design, develop, and maintain software applications from concept to deployment. You will collaborate with a talented team to write clean, efficient code, and will be expected to conduct Test-Driven and Security-Driven Development. You'll also troubleshoot and debug complex issues, perform code reviews, and contribute to maintaining the overall quality of our codebase. Your work will involve prototyping new features, optimizing existing systems for performance and scalability, and providing documentation to ensure our software is well-understood and easy to maintain.

The opportunity:

- 12 month work-term beginning May 2026.
- Full-time, paid internship: Monday - Friday, 37.5hrs/week.
- Your first week at Geotab begins with 'GEO Launch' - a one-week Employee Orientation. [Click here](#) to learn more!
- Learn more about the Geotab Campus Program [here](#).
- This posting is for an existing vacancy.

How you'll make an impact:

- Define, design, and implement new software applications in collaboration with other members of the development and technical teams, based on industry standards and best practices.
- Perform Test-Driven and Security-Driven Development.
- Conduct comprehensive code reviews and ensure that coding standards are followed.
- Analyze call stacks, trace files, debug logs or performance data to troubleshoot and identify the root cause of bugs.
- Participate in development of prototypes, minimum viable products and PoCs.
- Help maintain code quality, organization and automation.
- Perform maintenance programming for existing applications.
- Consider the functionality, performance, scalability, reliability, realistic implementation schedules and system architecture for each assignment.
- Provide design documents and documentation to ensure efficient maintenance and code reuse.
- Provide recommendations for improvements in the overall development process.

Job Requirements

What you'll bring to the role:

- Pursuing a Degree/Diploma in Computer Science, Math, Software Engineering or a related field.
- Experience with using Linux, C# and .Net and experience with object-oriented design, unit testing, optimization and multithreaded programming.
- Some experience programming with JavaScript, CSS and HTML.
- Experience in Python, TypeScript, ES6, .Net Core, Google Compute Engine, Google BigQuery.

- Working knowledge of Cloud computing experience with GCP, AWS and/or Azure.
- Excellent written and oral communication skills.
- Able to work well under pressure and respond to fast changing priorities and deadlines.
- Highly organized and able to manage multiple tasks and projects simultaneously.
- Strong analytical skills with the ability to problem-solve to well-judged decisions.
- A strong team-player with the ability to engage with all levels of the organization.
- Technical competence using software programs, including, but not limited to, Google Suite for business (Sheets, Docs, Slides).
- Entrepreneurial mindset and comfortable in a flat organization.

If you got this far, we hope you're feeling excited about this role! Even if you don't feel you meet every single requirement, we still encourage you to apply.

Citizenship Requirement N/A
