<b>Job Description</b>	

### **About Us**

Suger is a revenue platform that helps our customers grow on the fastest-growing B2B sales channel: the cloud marketplaces of AWS, Azure, GCP, and Alibaba. Launched in 2022, we take the tech debt out of marketplace sales by providing an API-first approach to quote-to-cash and billing processes. We're working with over 200 B2B customers, ranging from large enterprises like Snowflake and Intel to fast-growing startups like Glean and Vanta.

We are a Series A startup, funded by top-tier investors, including Threshold VC, Craft Ventures, Intel Capital, and Y Combinator.

### **About the Role**

We're looking for a curious and motivated Software Engineer to join our engineering team in Vancouver. You'll work closely with senior engineers and cross-functional teammates on meaningful projects that directly impact our product and customers. This is a great opportunity for a student looking to gain real-world experience in a supportive and fast-paced environment, with the potential for a return offer and conversion to a full-time position upon graduation.

**Term:** 4-month or 8-month term

**Type:** Full-Time, Co-op

## What You'll Do

- Collaborate with engineers on designing, building, testing, and shipping software features
- Write clean, maintainable code and participate in code reviews
- Debug issues and improve system performance and reliability
- Contribute to technical documentation and internal tools
- Learn and grow with mentorship from experienced team members

## What You'll Get

- Hands-on experience with real projects and mentorship from experienced engineers
- A chance to contribute to impactful software used by real customers
- A collaborative, friendly, and growth-oriented work culture
- Opportunities to participate in team events, tech talks, and learning sessions
- Pay range: \$20-\$30/hour

## Job Requirements

### What You Have

- Currently enrolled in a Master's program in Computer Science or a related field
- Strong foundational knowledge in programming (e.g., Python, Golang, JavaScript, Java, C++)
- Familiarity with web technologies, data structures, and algorithms
- Eagerness to learn new technologies and take initiative
- Collaborative, detail-oriented, and curious mindset

### Bonus Points

- Experience with Git, REST APIs, or databases (SQL)
- Exposure to cloud platforms like AWS, GCP, or Azure
- Past side projects, hackathons, or open-source contributions

**Citizenship Requirement**      Canadian & Permanent Residents Preferred

## APPLICATION INFORMATION

**Application Procedure**      Through Employer Website

**Cover Letter Required?**      Optional
