### **Description**

MDA Space (TSX: MDA) is a trusted mission partner to the global space industry, bridging the gap between what is proven and what is possible. As a pioneer in robotics, satellite systems, and geospatial intelligence, with a 55-year history of world firsts and over 450 missions, MDA Space is a global leader in communications satellites, Earth and space observation, and space infrastructure and exploration. With over 3,000 space experts across Canada, the United States, and the United Kingdom, MDA Space has the knowledge and expertise to transform a client's bold vision into a feasible mission, thanks to a unique combination of experience, technical excellence, and a sense of wonder that has been part of our DNA since day one. For those who dream big and push the boundaries on earth and in the stars in order to change the world for the better, we will take you there.

***Are you ready to take the next step in your career within the new space economy? We would love to hear from you!***

We are looking for a motivated and talented **Software Engineering student** to join our Software Engineering department at our Montreal office. This is a 4-month internship (with the possibility of 8 months) starting in May 2026.

Overall, the successful candidate will be treated as a new graduate joining our company, where duties will be assigned based on their level of education and experience to date.

The successful candidate will collaborate with a team responsible for the design of flight and test electronic systems. The student will participate in various stages of the software lifecycle, such as code verification and validation, integration, and testing.

As a **software engineering student**, you will be required to:

**Responsibilities:**

- Implement automation testing software under Windows for testing satellite electronics;
- Write test cases based on requirements;
- Working in an agile development environment;
- Participate in embedded development.

Please submit a copy of your CV and academic transcript when you submit your application.

**Comments/Special considerations:**

Successful candidates must obtain and maintain a security clearance at the reliability rating level and pass the security assessment for the Controlled Goods Program (CGP).

We are a dream team of passionate, collaborative, and determined individuals, and we are constantly looking for more people to join #TeamMDA to foster new and innovative approaches to problem-solving that drive us to improve life on and above Earth. If you are excited about expanding our presence in space and want to inspire the next generation, we will take you there.

We have entered a new era of exploration and development, and MDA invites all those who wish to join us and be a part of it. As an equal opportunity employer committed to diversity, integrity, and collaboration, we are dedicated to strengthening MDA's and Canada's leadership position in this new chapter.

MDA Ltd. is proud to offer accommodations during the recruitment process. If you require such accommodations, please indicate this in your application or cover letter, and we will work with you to meet your accessibility needs.

## Job Requirements

**Experience and skills required:**

Interested candidates must be working towards a bachelor's degree in engineering (electrical, computer) or computer science with three (3) years of experience.

- Some experience with Python, C, C++;
- Resourcefulness;
- Desire to learn;
- Show initiative.

**Desired skills:**

- Experience with embedded systems such as RPi, Arduino;
- Experience with GIT, JIRA, Confluence;
- Professional experience or related hobby/club experience.

**Citizenship Requirement**                    N/A

## APPLICATION INFORMATION

**Application Procedure**                    Through Employer Website

**Special Application Instructions**
