Salary Currency	CAD
Salary	4500.0 per month for 40 Major List
Job Description	

About us:

Checker Software (<https://www.checkersoftware.ca>) is a Vancouver-based startup (founded in 2017) that focuses on creating online tools and websites. We pride ourselves on staying up to date on the latest technological trends while still paying close attention to UI and UX. Millions of people have used our tools so far and we are growing quickly.

The position:

We're looking for a self-starter to join our team.

This position is for an 8-month co-op. This position is mainly in-person. Our office is located near Science World.

Ideally, we're looking for a big picture thinker who wants to be part of our decision-making process and impact the direction of our company.

We are a small startup: Your voice will be heard!

More details on the Company website - <https://www.checkersoftware.ca>

Our products:

- <https://www.diffchecker.com>

- <https://www.bibcitation.com>
- <https://www.svgviewer.dev>

The position is for a full-stack web developer that will probably end up working with several of these projects. You'll be moved from project to project depending on your interest and skill set. You'll also dip your toes in quite a few codebases, both back-end and front-end.

The front-end code on all our websites use React and Redux on the Next.js framework, written in TypeScript. Our back-ends are Node.js written in TypeScript.

If there are any code samples that you think might impress us, we'd love to see them. You can share them as a file or as a URL in your application.

Job Requirements

What we're looking for:

- experience in web development (HTML, CSS, JavaScript/TypeScript)
- experience in React or similar
- experience in using (or creating) REST APIs
- experience with a version control system (Git, SVN, etc)

Citizenship Requirement Canadian & Permanent Residents Only

Position Start Date September 01, 2025 12:00 AM

Position End Date April 30, 2026 12:00 AM
