QA Test Automation Co-op Student (Winter 2026)

OUR STORY

TechInsights is the information platform for the semiconductor industry. Regarded as the most trusted source of actionable, in-depth intelligence related to semiconductor innovation and surrounding markets, TechInsights' content informs decision makers and professionals whose success depends on accurate knowledge of the semiconductor industry-past, present, or future.

Over 650 companies and 125,000 users access the TechInsights Platform, the world's largest vertically integrated collection of unmatched reverse engineering, teardown, and market analysis in the semiconductor industry. This collection includes detailed circuit analysis, imagery, semiconductor process flows, device teardowns, illustrations, costing and pricing information, forecasts, market analysis, and expert commentary. TechInsights' customers include the most successful technology companies who rely on TechInsights' analysis to make informed business, design, and product decisions faster and with greater confidence. WHY WORK WITH US

- Expected salary: \$20-\$25/hour CAD
- Support for the community through charitable alliances
- Professional and career development opportunities
- Wellness resources and support from management
- Inclusive environment that prioritizes diversity, equity, and accessibility
- High-growth company driven by high performance

THE OPPORTUNITY

At TechInsights, our Co-op Student Program is founded on the principle of nurturing the next generation of talent by providing an immersive and enriching work experience. We aim to bridge the gap between academic learning and real-world application, offering students the opportunity to apply their knowledge in a dynamic and innovative industry. Through this program, we strive to foster a culture of mentorship, collaboration, and continuous learning, empowering co-op students to contribute meaningfully to our projects and initiatives.

This role is an on-site role at our Ottawa office.

Our Quality Assurance (QA) team is eagerly seeking a QA Co-op Student who excels in problem-solving. In this role you will contribute to TechInsights Platform software quality by designing and executing automated test scripts. Work collaboratively to enhance testing processes and gain hands-on experience in test automation, quality assurance, and software development. Join our team for a valuable learning opportunity in a dynamic environment.

WHAT YOU'LL DO

- Test Script Development
- Collaborate with software development teams to understand project requirements and design comprehensive test cases.
- Utilize programming languages (e.g., Python, Java, or scripting languages) to develop automated test scripts for functional, regression, and performance testing.
- Work closely with developers to integrate automated tests into the continuous integration/continuous deployment (CI/CD) pipeline
- Test Execution and Analysis
- Execute automated test scripts and analyze results to identify defects, ensuring software meets quality standards.

- Investigate and report issues, providing detailed information to assist developers in troubleshooting and resolution.
- Conduct root cause analysis for identified defects, collaborating with the development team to implement corrective actions.
- Report and metrics analysis - Tools design
- Develop Reporting Tools - Design and implement automated tools to generate reports that provide insights into QA team performance, test results, and defect trends.
- o Create Interactive Dashboards - Build user-friendly dashboards that visualize key QA metrics, enabling real-time monitoring and data-driven decision-making.
- o Optimize Data Processes - Streamline data collection, processing, and presentation to enhance efficiency and accuracy in QA reporting.

Job Requirements

WHAT YOU'LL BRING

- 3rd or 4th year university student in Computer Science or related discipline
- Programming proficiency: Python, Java, or scripting languages
- Test automation tools experience: Selenium, JUnit, TestNG, or equivalent
- Software development life cycle understanding
- Version control system knowledge: Git
- Agile methodologies familiarity
- Problem-solving skills: defect analysis and solution proposal
- Effective communication: verbal and written
- Attention to detail in test case design and execution
- Continuous learning and industry trends awareness
- Team collaboration and positive culture contribution

Citizenship Requirement N/A
