Job Description	

As a co-op/intern student at BMO, you will have the opportunity to be heard, keep growing and make a difference. You will be part of our campus program to gain the skills and knowledge needed to take on roles similar to the description listed below. Our student experience is designed to integrate you to the BMO team from day one by adding value in the work you do. You will have the opportunity to participate in programs such as the Women in Banking Mentorship Program, BMO Social Squad student-led activities, BMO Academy corporate learning platform, and access to various Employee Resource Groups to further develop your network within BMO.

Interested in learning more about our campus program? Stay up-to-date with BMO Campus Recruitment by following us on Instagram @BMOCanada and joining our LinkedIn group BMO Campus Recruiting & Early Talent.

Note: Only students currently enrolled in an academic program and returning to their studies will be considered for Co-op/Internship opportunities. Student who recently graduated are invited to apply to our New Grad opportunities which are available at <https://jobs.bmo.com/ca/en/new-grad>

To apply for this opportunity, please submit your cover letter, resume and an unofficial copy of your academic transcript. By applying for this general posting, you will be considered for a number of different student opportunities across multiple locations. If you are selected to move forward, you will be provided additional information.

Drives the overall software development lifecycle including working across functional teams to transform requirements into features, managing development teams and processes, and conducting software testing and maintenance. Specific project areas of focus includes translating user requirements into technical specifications, writing code and managing the preparation of design specifications. Supports system design, provides advice on security requirements and debugs business systems and service

applications. Applies deep knowledge of algorithms, data structures and programming languages to develop high quality technology applications and services - including tools, standards, and relevant software platforms based on business requirements.

- Translates user needs into technical specifications by understanding, conceptualizing, and facilitating technical requirements from user.
- Analyzes, develops, tests, and implements new software programs, and documentation of entire software development life cycle execution.
- Performs preventative and corrective maintenance, troubleshooting and fault rectification of system and core software components.
- Ensures that code/configurations adhere to the security, logging, error handling, and performance standards and non-functional requirements.
- Evaluates new technologies for fit with the program/system/eco-system and the associated upstream and downstream impacts on process, data, and risk.
- Follows release management processes and standards, and applies version controls.
- Assists in interpreting and documentation of client requirements.
- Focus is primarily on business/group within BMO; may have broader, enterprise-wide focus.
- Exercises judgment to identify, diagnose, and solve problems within given rules.
- Works independently on a range of complex tasks, which may include unique situations.
- Broader work or accountabilities may be assigned as needed.

Salary:

\$60,000.00 - \$111,700.00
