<b>Job Description</b>	

### **Who we are:**

For over 20 years, Global Relay has set the standard in enterprise information archiving with industry-leading cloud archiving, surveillance, eDiscovery, and analytics solutions. We securely capture and preserve the communications data of the world's most highly regulated firms, giving them greater visibility and control over their information and ensuring compliance with stringent regulations.

Though we offer competitive compensation and benefits and all the other perks one would expect from an established company, we are not your typical technology company. Global Relay is a career-building company. A place for big ideas. New challenges. Groundbreaking innovation. It's a place where you can genuinely make an impact - and be recognized for it.

We believe great businesses thrive on diversity, inclusion, and the contributions of all employees. To that end, we recruit candidates from different backgrounds and foster a work environment that encourages employees to collaborate and learn from each other, completely free of barriers.

### **Your role:**

The Frontend Web Developer Co-op is a member of a highly focused team, responsible for building a modern, sophisticated applications, using leading edge technologies. This is an opportunity to learn the ins and outs of front-end development, from writing pixel perfect CSS to using React and JavaScript to implement features. We will provide you with mentoring, code reviews and access to senior developers to help you with your tasks so you will learn lots!

### **Your job:**

- Using React.js, Typescript, JavaScript, HTML, and CSS to implement web UIs for Global Relay's core service offering
- Collaborate with UX and application teams on creating usable, beautiful and powerful user interfaces
- Implement features using our development process including design review, code reviews, continuous integration, extensive unit

testing, automated testing and see them all the way to production

- Work with QA to ensure that we build a quality product

### **Job Requirements**

#### **About you:**

- Sound computer science fundamentals
- Knowledge of object-oriented application design
- Experience creating web apps using HTML/CSS and JavaScript
- Exposure to JavaScript libraries, frameworks and platforms such as React.js, Redux, node.js, jQuery, AngularJS etc.

#### **Nice-to-have:**

- If you have them, we would love to see links to a Github profile, or to running projects you have worked on.

#### **To apply:**

Think you're a great fit for this job? Apply on our Global Relay Careers page with your cover letter, resume, and university transcripts in one PDF document. No emails or phone calls please; candidates must be legally authorized to work in Canada.

**Citizenship Requirement**                    N/A

## **APPLICATION INFORMATION**

**Application Procedure**                    Through Employer Website

#### **Special Application Instructions**

Please click the "I intend to apply to this position" button on SCOPE and also submit your application via the employer's website.
