### **Who we are:**

Geotab ® is a global leader in IoT and connected transportation and certified "Great Place to Work™." We are a company of diverse and talented individuals who work together to help businesses grow and succeed, and increase the safety and sustainability of our communities.

Geotab is advancing security, connecting commercial vehicles to the internet and providing web-based analytics to help customers better manage their fleets. Geotab's open platform and Geotab Marketplace ®, offering hundreds of third-party solution options, allows both small and large businesses to automate operations by integrating vehicle data with their other data assets. Processing billions of data points a day, Geotab leverages data analytics and machine learning to improve productivity, optimize fleets through the reduction of fuel consumption, enhance driver safety and achieve strong compliance to regulatory changes.

Our team is growing and we're looking for people who follow their passion, think differently and want to make an impact. Ours is a fast paced, ever changing environment. Geotabbers accept that challenge and are willing to take on new tasks and activities - ones that may not always be described in the initial job description. Join us for a fulfilling career with opportunities to innovate, great benefits, and our fun and inclusive work culture. Reach your full potential with Geotab. To see what it's like to be a Geotabber, check out our [blog](#) and follow us @InsideGeotab on [Instagram](#). Join our [talent network](#) to learn more about job opportunities and company news.

# Who you are:

We are always looking for amazing talent who can contribute to our growth and deliver results! Geotab is seeking a Cloud Developer Intern who will act as a cloud software developer, expanding on our use of cloud technologies. If you love technology, and are keen to join an industry leader, we would love to hear from you!

As a Software Developer Intern on Team Infrastructure your key area of responsibility will be hardening the local and cloud deployments of our applications, modernizing our tools, observability, and infrastructure as code base, and learn how to run and manage all of our applications. You will need to work closely with developer teams, cloud automation engineering teams, and other stakeholders.

# The opportunity:

- 8 month work-term beginning January 2026.
- Full-time, paid internship: Monday - Friday, 37.5hrs/week.

Your first week at Geotab begins with 'GEO Launch' - a one-week Employee Orientation. Click [here](#) to learn more!

# How you'll make an impact:

- Modernize application deployments modern IaC approaches
- You'll learn and contribute to the automation of infrastructure provisioning and management using industry-standard IaC tools like Terraform and Helm
- Improve application scalability, reliability, and availability through use of cloud technologies
- Explore and help utilize containerization technologies and orchestrations platforms like Kubernetes to enhance application portability and resilience
- Enhance application observability by use of modern open source tooling like Grafana and OpenTelemetry
- Learn to analyze telemetry data to identify performance bottlenecks, troubleshoot issues, and understand application behaviour
- Develop tooling to ensure scalability, reliability, availability, and observability
- Contribute to the development of scripts to automate routine operational tasks related to cloud infrastructure and application management
- Work with local stakeholders to improve developer experience when interacting with cloud deployments
- Assist in creating and refining documentation and best practice guides for developers using custom cloud resources and deployments
- Contribute meaningful code changes to code base
- Write, test, and debug code for application features, infrastructure automation, or internal tooling
- Learn to adhere to team coding standards and development methodologies

## Job Requirements

# What you'll bring to the role:

- Pursuing a Degree/Diploma in Computer Science, Math, Software Engineering or a related field.
- Experience with developing applications for a Linux environment
- Experience with **object-oriented design, unit testing, optimization and multithreaded programming (C# and .Net preferred).**
- Excellent written and oral communication skills.

**Citizenship Requirement**      N/A

## APPLICATION INFORMATION

**Application Procedure**      Through Employer Website

### Special Application Instructions

Please click the "I intend to apply to this position" button on SCOPE and also submit your application via the employer's website.  
Application Link: Job Application for Software Developer Intern, Infrastructure (Winter/January 2026, 8 Months) at Internship List  
Applications are accepted on a rolling basis and the posting may be expired at any time by the employer as submissions are received.

Students should submit their applications as soon as they are ready.
