<b>Salary</b>	20.0 per hour for 40 Major List

### **Job Description**

Baseline Payments is a Vancouver-based payments consultancy and fintech; we work with our portfolio of 2,000 clients on improving their accounts receivable and accounts payable processes. We also have our own technology -- a payments platform/cloud solution focused on EFT for both receivables and payables.

The DevOps and QA Engineering Intern will focus on automated testing and quality assurance (writing and maintaining automated tests for frontend/React and backend/Node.js, using Mocha and Chai), integrating test suites into the CI pipeline and analyzing test failures; contribute to and maintain GitLab CI/CD pipelines for automated builds, testing and deployment; deployment and cloud infrastructure (GCP); versioning and release management; project management and documentation; and other duties.

This position is contingent upon the receipt of funding from OCC/TOP.

### **Job Requirements**

Familiarity and experience with our stack: Python, Node.js, React, GCP, Chai/Mocha, GitLab, Atlassian tools, Cursor. Familiarity with fintech platforms would also be an asset, as would strong communication and documentation skills. This is team-based work at the Baseline office in Mt. Pleasant, with a variety of younger UBC grads and more experienced devs.

**Citizenship Requirement** Canadian & Permanent Residents & Refugees Only

## **APPLICATION INFORMATION**

<b>Application Procedure</b>	Through UBC Science Co-op
