<b>Job Description</b>	

### **Co-Op Opportunity: Junior Developer (8-Month Term Minimum)**

We're looking for a curious and motivated Co-Op student to join our team!

If you're passionate about making systems smoother, more reliable, and easier to scale - and you're excited to work with a team that values clean code, smart automation, and practical solutions - we'd love to hear from you.

#### **What You'll Be Doing:**

- Designing and maintaining automated test suites for our core applications
- Collaborating with developers to improve our CI/CD pipelines
- Supporting infrastructure and deployments using Docker, Linux, and cloud environments (AWS or Azure)
- Writing clean, maintainable Python code for features, test scripts, and automation tools
- Helping to evolve our DevOps practices as we scale our systems
- (Optional) Contributing to our JavaScript-based frontend services

#### **Why You Might Like It Here:**

- You'll have input into how things are built, tested, and deployed - even as a Co-Op
- We're collaborative, not bureaucratic - good ideas are always welcome
- There's room to grow your skills - whether that's in automation, DevOps, or full-stack development
- You'll be part of real projects that matter, not just "intern tasks"

- Software teams are primarily remote with a few days in office when needed.

**Our Current Tech Stack Includes:**

- ERP Systems
- Python (ORM API development)
- JavaScript (React-based frameworks)
- XML (Templates built in XML, QWEB, Jinja)
- Other Projects: Elixir (Phoenix Framework)
- Infrastructure: Docker, AWS

**Job Requirements**

**What We're Looking For:**

- Python skills (this is essential!)
- Familiarity with CI/CD tools like GitHub Actions, GitLab CI, or Jenkins
- Experience working with databases and ORMs (PostgreSQL is a plus)
- Comfort working in Linux and containerized environments (Docker)
- An understanding of cloud infrastructure (AWS and/or Azure)
- A proactive attitude towards testing, automation, and continuous improvement

**Bonus Points For:**

- Exposure to ERP systems or workflows (manufacturing, accounting, or sales)
- Experience with JavaScript and/or React

*Only candidates who are legally authorized to work in Canada (citizens, permanent residents, or those with a valid work permit) will be considered for this position.*

**Citizenship Requirement**                  N/A

## APPLICATION INFORMATION

**Application Procedure**                  Through Employer Website

**Cover Letter Required?**                  Optional

**Special Application Instructions**

Please apply via the link here:

<https://dropgroup.bamboohr.com/careers/90>

**Please click the "I intend to apply to this position" button on SCOPE and also submit your application via the employer's website.**

Applications are accepted on a rolling basis and the posting may be expired at any time by the employer as submissions are received.

Students should submit their applications as soon as they are ready.
