<b>Job Description</b>	

The Scrawlr Frontend team is seeking a talented Software Developer with an eye for detail and a passion for software quality.

### **About Scrawlr**

Scrawlr is a company building a software platform and series of products dedicated to enabling alternative forms of communication layered on existing internet content, together with delivering superior monetization flexibility and content ownership for content generators. We have recently completed our internal beta and are preparing for our external beta. We are looking forward to bringing on additional like-minded individuals to assist in product launch. The founder, board of directors, and lead investors in Scrawlr have a strong background in a variety of successful, transformational startups, and we are building our platform alongside a number of other startups within a successful ecosystem.

### **Why you should work here**

We are working on a transformational project that we believe will have a global impact, and we expect our team members to work on solving complex, unique technical problems on a daily basis. Frontend team members are given a high degree of product ownership and the latitude to propose and implement approaches that can be divergent from all standard or existing solutions. Scrawlr is committed to maintaining an environment in which all ideas are taken seriously and great ideas are adopted, allowing dedicated employees to effect change and to dictate their progression within the organization.

Co-op students who perform in line with expectations will be provided with the opportunity to immediately transition to a full-time position at Scrawlr.

If you are interested in changing the way the world communicates, and then subsequently evaluates and monetizes content, we would love to speak with you. This position is a unique opportunity for an individual interested in launching a transformational

product in a challenging, dynamic work environment.

We are looking for exceptional individuals, and from there we can work with all levels of experience. If what we are doing is of interest to you, but you are not sure if you fit into this role, we look forward to engaging to find the right position.

**Please note:** Candidates must be currently authorized to work in Canada.

*We are an equal opportunity employer, and all qualified applicants will receive consideration for employment without regard to race, colour, religion, sex, national origin, disability status, protected veteran status, or any other characteristic protected by law*

#### **Job Responsibilities**

- Build frontend components and features
- Connect frontend with local storage and backend APIs
- Testing and testing infrastructure upgrades

#### **Job Requirements**

##### **Desired skills & experience**

- Strong experience with SolidJS or alternative framework
- Strong knowledge of HTML/CSS/JavaScript
- Experience with NodeJS
- Experience with REST API
- Strong communication and interpersonal skills

##### **Nice to have skills and experience**

- UI Design Best Practices
- Advanced CSS Techniques
- Knowledge of web performance techniques
- Linux command line and desktop experience

**Preference given to 3rd year or higher Computer Science or Engineering, or students with relevant personal/work experience.**

**Citizenship Requirement**                    N/A

## **APPLICATION INFORMATION**

**Application Procedure**                    Through UBC Science Co-op
