Job Location	Ottawa, ON
Country	Canada
Duration	4 months
Work Mode	Hybrid
Salary Currency	CAD
Salary	Salary Not Available, 0 Major List
Job Description	

Ribbon Communications is looking for a hands-on UI Engineer to assist in the design and development of features in our next-generation application user interface. The ideal candidate will have experience in or interest and aptitude toward contemporary user interface design.

The position will be within the Advanced Technology development team, working on the latest technologies in the Big Data and Analytics space using contemporary data visualization and UI frameworks as a front end to the latest Big Data platform engines such as Kubernetes/Docker, Hadoop, and Angular within a virtualized, micro-services application architecture.

A successful candidate must be self-driven, possess a strong work ethic, with a career interest in software development. They must be excited about working with new technologies and comfortable working in a dynamic work environment.

As part of our team you will

- Prototype/Design and ultimately deliver new UI feature content from the ground up or by leveraging appropriate industry standard technologies
- Debug/fix/improve the current user interface
- Embrace a culture of continuous improvement at all levels, never being afraid to question or to seek to find a better way.
- Design and produce high quality, well-architected and supportable software that you can be proud of.

Please Note:

'All qualified applicants will receive consideration for employment without regard to race, age, sex, color, religion, sexual orientation, gender identity, national origin, protected veteran status, on the basis of disability, or other characteristic protected by applicable law.'

Job Requirements

QUALIFICATIONS

- Highly motivated, demonstrating a strong work ethic through academic achievement
- Previous Co-Op and/or Intern experience is not required
- Some level of experience with the following technologies is beneficial
- Modern Client MVC/MVP frameworks such as Angular, jQuery, Backbone, Node, Bootstrap, or React
- HTML5 / CSS3 / SASS
- REST

Citizenship Requirement N/A
