Job Location	Ottawa, ON
Country	Canada
Duration	4 months
Salary Currency	CAD
Salary	Salary Not Available, 40 Major List
Job Description	

Job Description:

QNX is a world leader in the embedded software that drives many of the world's most interesting products. From space cameras to nuclear reactors to autonomous vehicles and sophisticated medical devices, QNX provides the foundation operating system that runs these systems.

Position Summary

As a member of the Core Networking Test team, the student position involves designing, implementing, and executing manual and automated Software testing on the Networking components. In this role, the student will learn about QNX Core OS technologies and different test strategies in depth and apply that knowledge to design tests for new features, test scripts, test automation, product verification and issue detection.

Location: Ottawa, ON

Length of Term: 4 Months

You will:

- Learn and design new manual test cases
- Write test automation and run automation tests
- Investigate issues found, report on the quality and performance of new software builds.
- Verify fixes and implement test cases to automate the verification of issues.
- Work directly with QNX software developers and testers who are industry experts on embedded systems software and technologies.

Why Join QNX?

- Mentorship & Learning: Access to professional development courses, mentorship programs, and our on-demand learning platform

- Wellness Support: Access to events that support physical, mental and financial wellness. We host wellness sessions, fitness courses, discounts to local gyms, recreational leagues and offer a 24/7 Employee Assistant Program (EAP)
 - Collaborative Culture: Highly collaborative teams and a supportive workplace environment, with organization-wide events and a student social committee
 - Employee Perks: Enjoy snacks, beverages, and discounts at local stores, restaurants, and gyms
- At QNX, it all starts with you!

Job Requirements

You will have:

- Familiarity with QNX, Linux or other UNIX-like operating systems
- Programming experience in Python, C and scripting
- Experience working with a network stack would be an asset
- Excellent communication and interpersonal skills
- An eagerness to learn and solve problems

Citizenship Requirement N/A
