Application Deadline: **September 15, 2025**

Req #401

Your opportunity

By joining the Kardium team, you can help make a difference in the lives of millions around the world. We have developed a ground-breaking medical device for the diagnosis and treatment of the most common heart rhythm disorder, atrial fibrillation - which can cause stroke, heart failure, and other heart-related complications.

Kardium's mission is to deliver the best treatment for atrial fibrillation. To achieve this, we have developed The Globe® Pulsed Field System - we have a fantastic technical team that has developed a product with strong, unique, and customer-valued differentiators versus other solutions on the market. We have built connections with key opinion leaders who are already using the Globe System and are helping to tell our story.

We are now preparing for our upcoming commercial launch. This is an exciting and significant milestone in our journey to bring this ground-breaking technology to patients.

As a member of the Clinical Operation team, you will get hands-on experience performing data management and data cleaning activities for Kardium clinical trials. Support members of the Clinical Operations team with a range of data-related tasks pertaining to past, current or future clinical trials.

Please note, this opportunity is a hybrid work arrangement, located in Burnaby, BC.

Meaningful work you will be a part of

You will engage in activities that develop practical and transferable skills such as:

- Supporting data collection review and data cleaning activities
- Summarizing data metrics on an ongoing cadence
- Supporting development of data collection tools and standards
- Supporting data cleaning for clinical trial protocols
- Supporting development of data management standards and procedures
- Communicating data metrics to the Clinical Operations team
- Supporting development of data visualization tools

Job Requirements

What you bring to the team

Our Kardium team is smart, creative, and passionate about creating cutting-edge medical devices to help improve people's lives. We work within a collaborative environment based on trust and respect and we understand that only by working together can we solve the unsolvable.

You will be successful in this role because you possess these attributes:

- Detail oriented
- Thrive in a fast-paced environment where data analytics is required to drive decisions
- Have a background in data sciences or epidemiology
- Proficient in the use of Microsoft Excel or similar data tools
- Ability to understand and interpret datasets and communicate findings
- Skills in data visualization
- Collaborative and willingness to work with multiple stakeholders

Citizenship Requirement N/A
