### Front-End / Full-Stack Developer

Location: Vancouver, British Columbia

Inspire the World, Create the Future

Do you believe in the power of technology to help shape a brighter future and a stronger global community? Are you inspired by the possibilities? Are innovation, camaraderie, and the pursuit of excellence part of your innate drive? Then you've got what it takes to succeed at Samsung.

Samsung R&D Canada is looking for an enthusiastic co-op student who will be responsible for front-end web application development, while also contributing to backend solutions. In this role, you will work with talented software engineers on real world global-scale projects. The primary focus will be to develop frontend logic, make API requests, create and maintain API endpoints, and handle responses from other back-end services. A basic understanding of front-end technologies is necessary.

#### What You'll Do

- Implement cloud-based products and services
- Integrate with external customer and 3rd party systems
- Write sound code, perform code reviews, write unit and integration tests
- Write documentation
- Participate in team scrum
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency

#### Additional Information:

- \$20-\$27/hr (Co-Op pay will be determined based on a number of factors and may vary depending on job-related knowledge, completed study terms, relevant skills, and experience)
- 8 months (May-December)
- Hybrid (Monday-Thursday in office, located in Vancouver)

- Interviews will be 30-45 minutes with selected candidates

## **Job Requirements**

### **What You'll Bring**

- Pursuing a Bachelor's or Master's degree in Computer Science or Engineering
- Some knowledge or experience in one or more of the following areas:
  - Modern JavaScript (ES7+)
  - React (most preferred)
  - React based meta frameworks like Next.js, Remix, Tanstack
  - NPM / PNPM
  - Node.js as a tool for front-end app bundling
  - Webpack (and Module Federation plugin)
  - CSS/SCSS
  - TypeScript
  - Component library tools like ShadCN, RadixUI, MUI, or others.
- REST API design and development
- Backend knowledge of Node.js as a server runtime
- Backend knowledge on Java, Spring Boot, Kafka and related technologies
- Have general understanding of web related protocols (ex. TCP/IP, REST, gRPC, HTTP 1/2/3, TLS, Web Sockets, Server Sent Events), building micro front-end apps, CI/CD and source versioning (ex. GitHub, GitHub Actions)
- E2E willingness to act on problem solving independently of the technology involved
- Have basic computer science fundamentals in data structures, design patterns, algorithm design, and complexity analysis
- Team player with great interpersonal and communication skills
- Self-motivated and strive to find answers when faced with roadblocks

**Citizenship Requirement**      N/A
