Job Description	

Description

Help bring AI agents to companies worldwide.

Over the next decade, autonomous agents will redefine how we work.

Botpress allows companies to build and deploy advanced AI agents that move beyond conversation into real business logic.

Our product works today and at scale, across industries, regions, and limitless use cases.

As the 3rd fastest-growing B2B AI start-up worldwide, we're at the forefront of the AI revolution, providing the most widely-used platform for sophisticated AI agents.

The work ahead is ambitious. The opportunity is rare. We take a deliberate approach to growth: product-led, capital-efficient, and highly focused.

If you want to build foundational technology for one of the most meaningful platform shifts in software, we're looking for top talent to join us.

Key Highlights:

- Over 1 million AI agents and chatbots deployed
- 700,000+ platform users
- Trusted by 35% of Fortune 500 companies
- 7 years of expertise in AI solutions

About the role

We're hiring a Developer Relations Video Content Inter to help expand our YouTube presence in the software, B2B SaaS and AI fields for winter (January-April). This role is ideal for students with a technical background (experience with software, devs, coding projects, etc.) who are interested in researching and communicating complex topics to a broad audience on YouTube.

You'll be working on our Content Marketing team to create video content for our audience of developers and amateur coders. This could include researching, scripting, editing, digital publishing, and/or featuring in our YouTube videos. You'll gain real-world exposure to developer relations, including how to break down technical concepts into clear, engaging narratives, showcase practical use cases of our platform, and build content that resonates with developer communities. You'll also see how developer-focused content drives awareness and adoption in a fast-growing SaaS start-up.

Responsibilities

- Research technical topics in software, AI, and SaaS to inform video content
- Draft, edit, and refine video scripts for developer-focused YouTube content
- Collaborate with the content and developer relations teams to brainstorm new video ideas
- Participate in production - whether behind the scenes or on camera - to bring technical concepts to life
- Help optimize video content for engagement and reach, including SEO and YouTube best practices
- Support the measurement and reporting of video performance, drawing insights to improve future content

About Botpress

Botpress recently raised its \$25 million Series B funding. As a fast-growing start-up, we run a lean and innovative ship that leans on AI for maximum business impact. At Botpress, everyone is an owner, bringing their unique perspective and talents.

Our teams are talented and passionate. We intentionally hire individuals who are eager, passionate, talented, and hungry to learn and grow throughout their career.

We operate fully in-office, with a culture that values both technical rigor and shared ambition.

You'll be on a team that's not just adapting to the AI revolution, but leading it. Joining our team means changing the future of enterprise AI and building technology that will define the next era of business automation.

Benefits

- Work at one of Canada's fastest-growing AI start-ups
- Work with a talented and passionate team
- 2 weeks of vacation
- Fully-stocked fridge and cupboard - we take snacks seriously
- Your own desk - no 'hot-desk'-style sign-up systems
- A vibrant office community, including weekly socials

Job Requirements

Requirements

- Strong technical foundation (coding projects, software courses, or developer experience)
- Clear and engaging communication skills - both written and verbal
- Ability to explain complex concepts in a way that's approachable for a broad audience
- Comfortable experimenting with video as a medium (no need for prior on-camera experience, but an interest helps)
- Curious, proactive, and motivated to make an impact in developer communities
- Interest in AI, SaaS, and developer relations
- Bonus: familiarity with YouTube, social media trends, or video editing tools

Citizenship Requirement N/A

APPLICATION INFORMATION

Application Procedure Through Employer Website

Special Application Instructions

Application Link: <https://apply.workable.com/botpress/j/57B0318A17/>

Please click the "I intend to apply to this position" button on SCOPE and also submit your application via the employer's

website.

Applications are accepted on a rolling basis and the posting may be expired at any time by the employer as submissions are received.

Students should submit their applications as soon as they are ready.
