Technology - AI & Data Science - Intern

Kroll is a global leader in Risk and Financial Advisory services, operating at the intersection of data, technology, and complex decision-making. We are seeking a high-performing Data Engineering Intern to help build and scale the data infrastructure that powers analytics, automation, and AI across the firm. This role is for candidates who want real engineering responsibility, not shadow work. You will design and implement production-grade data pipelines, work with cloud-native tooling, and partner with senior engineers and data scientists on systems that matter.

At Kroll, your work will help deliver clarity to our clients' most complex governance, risk, and transparency challenges. Apply now to join One team, One Kroll.

RESPONSIBILITIES:

- Collaborate with cross-functional teams to understand business needs and provide data-driven insights.
- Explore and experiment with new use cases, frameworks, and tools to enhance AI capabilities.
- Support the deployment and monitoring of AI Solutions in production environments.
- Conduct research on emerging trends in data science and AI to stay updated with industry advancements.

- Prepare reports and presentations to communicate findings and recommendations effectively.

About Kroll

Join the global leader in risk and financial advisory solutions-Kroll. With a nearly century-long legacy, we blend trusted expertise with cutting-edge technology to navigate and redefine industry complexities. As a part of One Team, One Kroll, you'll contribute to a collaborative and empowering environment, propelling your career to new heights. Ready to build, protect, restore and maximize our clients' value? Your journey begins with Kroll.

Your recruiter will be happy to walk you through your U.S.-specific benefits, which include:

- Healthcare Coverage: Comprehensive medical, dental, and vision plans.
- Time Off and Leave Policies: Generous paid time off (PTO), paid company holidays, generous parental and family leave.
- Protective Insurances: Life insurance, short- and long-term disability coverage, and accident protection.
- Compensation and Rewards: Competitive salary structures, performance-based incentives, and merit-based compensation reviews.
- Retirement Plans: 401(k) plans with company matching.

Please note that benefits may vary by region, department and role. We encourage you to speak with your recruiter to learn more about the specific benefits available for your position.

Kroll is committed to creating an inclusive work environment. We are proud to be an equal opportunity employer and will consider all qualified applicants regardless of gender, gender identity, race, religion, color, nationality, ethnic origin, sexual orientation, marital status, veteran status, age or disability.

In order to be considered for a position, you must formally apply via careers.kroll.com.

Salary range for this role is \$25 - \$30 CAD/hr

Job Requirements

REQUIREMENTS:

- Currently pursuing a degree in Computer Science, Software Engineering, Information Systems, Data Engineering, or a closely related technical field
- Graduation date between December 2026 and September 2027
- Knowledge of data visualization tools such Power BI.
- Understanding of statistical methods, data structures, and algorithms.
- Excellent analytical, problem-solving, and communication skills.
- Ability to work both independently and as part of a team in a fast-paced environment.
- Familiarity with cloud platforms (AWS, GCP, Azure) and big data technologies is a plus.
- Prior experience with AI/ML projects through coursework, personal projects, or previous internships.
- Experience with version control systems such as Git.

Citizenship Requirement N/A
