Job Title: Co-op Winter 2026 - Software/Systems Engineering - 8-12 Months

Job ID: REF833H

Company Description

At General Dynamics Mission Systems-Canada, our focus extends beyond engineering technology solutions-we are dedicated to cultivating careers. If you seek a purpose-driven career solving some of the world's most critical problems, alongside some of the brightest engineering minds, your application is welcome. Join a community where your unique perspective propels innovation.

Why Join Us?

- Realize your Impact:** Our work enables customers to successfully navigate missions across diverse domains of operation. Your fresh perspectives and ideas have the power to shape real solutions, influence projects and drive meaningful change.
- Kick-start your Career:** Immerse yourself in various industry facets, gaining insights that span from cutting-edge technology to project management. Elevate your resume with a distinguished company to set the stage for a rewarding career, while paving the way for future full-time opportunities within General Dynamics.
- Grow your Network:** Work side by side with talented professionals who are excited to share their experience and develop your skills. Have meaningful interactions, ask questions, and build relationships that can lead to lasting industry connections.
- Balance your Life:** We have On-site and Hybrid positions, this is often dependant on the nature of your role. We offer a variety of options for your work schedule which includes compressed work week options, flexible start times and shut down periods. We champion work-life balance, ensuring you have time for personal endeavors and your professional aspirations.

Job Description

The Applications Program for the Land C4ISR Program is looking for a Co-op Software Engineer to join our team. We develop and integrate various software products that enable the Canadian Army to support and accomplish their missions. Our focus is predominantly on Battle Management and Planning applications. On this team, you can expect to work in an Agile development framework on a variety of different technologies, including deploying web-based server applications, and working with messaging networks over tactical radios.

In this role, you can expect to:

- Implement software to meet the requirements, Definition of Done and Acceptance Criteria
- Develop and perform tests and debugging of code
- Identify defects, resolve issues and verify changes
- Support and perform Product level test and integration efforts
- Participate in code reviews
- Participate in Agile ceremonies, including PI Planning, Sprint Planning, Daily Scrum, Sprint Review, and Sprint Retrospective
- Expand knowledge of latest technologies, products and market trends relevant to area of work
- Performing related duties as assigned

Additional Information

We believe the unique contributions of each of our colleagues are key in our ability to drive innovation. By fostering a culture of belonging, encouraging idea sharing at all levels, and reinforcing the very real impact of what we do, we offer an environment where everyone can take pride in their work. If you require accommodation during any stage of the application process, please contact Human Resources via recruitment@gd-ms.ca.

Job Requirements

Qualifications

- Currently pursuing a degree in Computer, Software, or Systems Engineering, Computer Science, or other related field.
- Strong communication skills, both verbal and written.
- Experience in, or interest to learn C#, Java, Python.
- Experience with the Canadian Army is an asset.
- Experience with AI models is an asset.
- Experience with databases is an asset.
- Experience with distributed systems is an asset.
- Experience with automated testing is an asset.

It is a requirement that General Dynamics Mission Systems-Canada be registered with the Canadian Controlled Goods program and that all of its workforce be security assessed. Successful applicants must meet all applicable security requirements, including but not limited to the ability to obtain and maintain a Canadian government security clearance. Applicants may be required to meet additional security requirements in order to gain access to technical data, classified areas or information that is subject to international regulations. You must be eligible to work in Canada.

Citizenship Requirement N/A
