Description

IT Risk Management / Location: Quebec City or Montreal / Summer 2026 Internship with Possibility of Extension / Hybrid

Build the future with us

Are you driven by compliance and audit and eager to contribute to the purpose of a company that aims to help its clients feel confident and secure about their future? As an **Intern - IT Risk & Compliance Analyst**, you will play a key role in assessing technological risks and supporting the compliance activities of the Information Technology Vice Presidency (VPTI).

This position is a great opportunity to showcase your skills and fully realize your potential within a caring and trustworthy company. Here, people and their development are at the heart of our priorities, fostering an environment that encourages collaboration and innovation.

What you will accomplish with us

As an ***Intern - IT Risk & Compliance Analyst***, you will be at the core of our mission. Here are the main responsibilities:

- Analyzing compliance elements and technological risks.
- Contributing to control monitoring by performing verifications and assisting with process documentation.
- Providing administrative support to ensure consistency in risk management activities according to established standards.
- Participating in special mandates by offering logistical support and contributing to research and analysis.
- Helping prepare quarterly IT risk and compliance reports by collecting and organizing required data.
- Assisting with deadline tracking by preparing follow-up reports.

Why you will love working with us

- A work environment where learning and development merge with a collective pursuit of excellence.
- A healthy, safe, fair, and inclusive environment where potential can be freely expressed and developed.
- The possibility to work in a hybrid environment supported by flexibility and access to inspiring, innovative workspaces.
- Student benefits: Access to internal training, mentoring, involvement in real projects, flexible schedules adapted to studies, and a rewarding experience for your professional journey.

Job Requirements

What could accelerate your success in this role

We are looking for someone who:

- Is currently enrolled in a bachelor's or master's degree in IT, cybersecurity, business administration, accounting, or any other relevant field.
- Is recognized for autonomy, proactivity, and the ability to manage multiple requests simultaneously.
- Stands out through leadership, rigor, analytical thinking, and strong communication and collaboration skills.
- Shows great interest in IT compliance and risk, and is comfortable with technological tools such as advanced Excel functions and artificial intelligence.
- Is familiar with LEAN principles (an asset).
- Has practical experience in auditing (an asset).

Citizenship Requirement N/A
