| Job Description | |

The Company:

Tochtech Technologies is a digital health company, developing IoT (Internet of Things) products and solutions for the growing senior care market segment. Tochtech is based in Delta, BC.

The IoT is a rapid growing area with exciting opportunities in smart home and smart community solutions. Additionally, the growth of the world's senior population is becoming a global challenge in search of a solution. If you are looking for a hands-on role working with different technologies: IoT, Big Data, Machine Learning, Mobile app... come join us, we have it all! Be ready to join the excitement of making real contribution to a real world challenge!

Job Description

You will work with our product manager and development team to review the design, test the hardware and software, and support customers. You will have the opportunity to grow your knowledge and experience of IoT infrastructure and explore different sensor technologies and products. Our co-op experience is unique and designed to prepare you for professional success. If you are passionate about data analysis and looking for an opportunity to practice your skills in the exciting world of IoT, Big Data and Machine Learning, come join our energetic and creative environment.

This is a hybrid role, working remote and in the office

Job Requirements

Relevant Skills & Experience

- Coding skills in relevant programming languages and libraries/frameworks (e.g., JavaScript, React, Python)

- Preference will be given to knowledge and experience in the following areas:
 - Manual testing and bug reporting
 - Data structures and algorithms
 - Test script development, execution and report generation
 - Data Analytics, Machine Learning, AGI
- Experience in creating and maintaining technical documentation, such as help documentation, user manuals.
- Attention to detail, ability to spot mistakes and identify potential solutions.
- Solid written English and comfortable communicating with clients over the phone.

Education: Working towards a Computer Science, Engineering, or Mathematics degree.

Citizenship Requirement N/A
