#### **Closing Date: October 2, 2025**

The British Columbia Investment Management Corporation (BCI) is currently seeking a Software Engineer Co-op Student/Intern for the Winter (January to April 2026) work term to support the Technology team. If you are a highly motivated, team player who can handle multiple projects and are interested in developing your professional career and learning more about driving sustainable growth, accelerating innovation and operating on a global scale, this is the opportunity for you!

#### **WHAT YOU NEED TO KNOW**

BCI manages a globally diversified portfolio of gross assets valued at \$295.0 billion and is one of Canada's largest institutional investors. We invest globally to support pension and other funds for more than 30 clients based in British Columbia. We are proud to have been chosen as one of **Canada's Top 100 Employers** and **BC's Top Employers**. These national and provincial competitions recognize employers who offer exceptional workplaces for their employees.

The Software Engineer Co-op/Intern will work within our Technology department. This is a great opportunity for you to learn and apply your knowledge to support the development and implementation of a new application that will allow the Business Solution Analysts to reduce their development and deployment of new enhancements.

## **WHO YOU WILL WORK WITH**

The Technology department is responsible for developing technology solutions that contribute to the achievement of BCI's mission and long-term goals. The department manages the Corporation's business applications and information technology infrastructure, providing support to a large group of financial professionals. The department is also responsible for authoring technology-related directives and conducting disaster recovery planning to minimize risk to the Corporation's delivery of investment services. The Applications and Operations team works with other Technology teams as well as internal client departments and vendors to create, configure, implement, and administer a portfolio of vendor and web-based applications.

## **WHAT YOU WILL BE DOING**

- Provide analytical and programming support for the development of new applications
- Research complicated problems; works with business representatives in defining design specifications and technical solutions, providing appropriate systems and/or business solutions
- Present system solutions to clients, both verbally and by means of documentation to gain consensus for application enhancements and problem fixes
- Translate user requirements into technical specifications
- Identify system inadequacies and efficiencies and recommends improvements
- Participate in the change control processes for software releases and application upgrades
- Assist in the progression of systems changes through the application environments ensuring proper testing and approvals
- Documents changes to procedures, applications, and data stores using standard tools and templates
- Conduct business analysis sessions with clients - translates business needs into technical specifications employing workflow diagrams, data analysis and joint application reviews
- Develop support documentation such as operational support model and technical user guides.
- Maintain support documentation and content into the application Jira and Confluence space repository
- Participate in Kanban/Scrum to coordinate user stories and tasks in support of Product Owners
- Provide or arrange training on new procedures and applications functionality
- Ad-hoc projects and tasks as assigned by the team

## **WHAT WE OFFER**

- Training and mentorship to develop your knowledge and professional skill sets that are required to succeed in the industry
- Be a valued part of a team and work culture that is down to earth, values your perspective and rewards transparency and accountability
- Exposure to some of the most talented, approachable, and inspiring people in the industry
- Time to connect and build your network with other Interns and BCI professionals that will contribute to your professional network and future career opportunities
- Work with a dynamic team in a fast-paced environment
- The development of real-world skills at one of the largest institutional investors in Canada
- Exposure to some of the most talented, approachable, and inspiring people in the industry
- The ability to opt-in for access to Dialogue, a user-friendly app that offers virtual primary care, employee and family services, and mental health supports
- Time to connect with co-op students & interns at BCI - build your network and shared learning
- Two paid days per year for volunteering
- Competitive pay: \$2,330.00 gross bi-weekly or \$2,155.00 gross bi-weekly + vacation leave paid based on 6% of salary (\$2,330.00 gross biweekly for those with (or working towards) a graduate degree and \$2,155.00 gross biweekly for those with (or working towards) an undergraduate degree, diploma, or certificate)
- Travel: if coming to Victoria for this work term, BCI will provide a fixed-rate travel allowance based on your location

## **THE DETAILS**

- Work term: Winter (January to April 2026)
- Department: Technology
- Office Location: 750 Pandora Avenue, Victoria, BC
- Spend your off hours exploring beautiful Victoria and Vancouver Island
- All co-ops/internships will need to be completed in person at our Victoria office with the option to work one day per week from home. Please note, some positions are not eligible for hybrid work

**At BCI, we value diversity and believe in fostering an inclusive culture where all employees can be successful.**

**We are performance and client focused and value integrity; if you share these values, we want to know you.**

**We recognize that some skills can be learned on the job and encourage all to apply.**

**If you require an accommodation for the recruitment process (including alternate formats of materials, accessible meeting rooms or other accommodations), contact us at [co-op@bci.ca](mailto:co-op@bci.ca).**

**We would like to hear from you!**

## **Job Requirements**

### **REQUIRED SKILLS**

- A fundamental knowledge of development life-cycle and business and investment-related disciplines is essential
- University-level knowledge of related courses (e.g., computer science)
- Analytical, problem solving and design experience, and expertise in the use of programming tools and techniques
- Technical writing skills
- Familiar with source control tools (e.g. Git)
- Familiar with creating workflow diagrams and flowchart processes
- Ability to use Excel, PowerPoint, Word, and Outlook
- Experience supporting third-party products and hosted solutions is an asset
- Familiar with Agile methodologies and processes is an asset
- Knowledge of finance and capital markets is desirable
- Team player who has the drive to continue learning, excel, and grow in a team oriented and dynamic environment
- Ability to communicate clearly and concisely, both orally and in writing
- Exhibit a high level of professionalism and excellent interpersonal skills
- Strong relationship-building and customer service abilities, proactive, results oriented and resourceful
- Ability to meet deadlines while maintaining accuracy, excellent product quality and attention to detail
