<b>Job Description</b>	

25WD91415

Autodesk is the global leader in design and make technology, including industry-leading 3D design, engineering, and entertainment software and services, that offer customers better outcomes through automation and insights for their design and make processes. If you've ever driven a high-performance car, admired a towering skyscraper, used a smartphone, or watched a great film, chances are you've experienced what millions of Autodesk customers are doing with our software.

This role is to join the Autodesk Alias team, which is building industry leading software for automotive and industrial design! Alias is a software package that incorporates sketching, concept modeling, surfacing, visualization, and computational design. In this role, you will help develop the tools, workflows, and algorithms that power our software and enable our users to design the products and vehicles you see and use every day. Please note that this is a hybrid position for Winter 2026 (January -April 2026 work term)

#### **Responsibilities**

- Contribute to the design, implementation, testing, and deployment of Alias software
- Apply core engineering principles to ensure quality, usability, and performance
- Perform code and system analysis to identify and fix defects
- Participate in agile development process, including daily scrum, sprint planning, code reviews, and quality assurance activities

#### **About Autodesk**

Welcome to Autodesk! Amazing things are created every day with our software - from the greenest buildings and cleanest cars to the smartest factories and biggest hit movies. We help innovators turn their ideas into reality, transforming not only how things are made, but what can be made.

We take great pride in our culture here at Autodesk - it's at the core of everything we do. Our culture guides the way we work and treat each other, informs how we connect with customers and partners, and defines how we show up in the world.

When you're an Autodesk, you can do meaningful work that helps build a better world designed and made for all. Ready to shape the world and your future? Join us!

#### **Salary transparency**

Salary is one part of Autodesk's competitive compensation package. Offers are based on the candidate's experience, educational level, and geographic location.

#### **Diversity & Belonging**

We take pride in cultivating a culture of belonging where everyone can thrive. Learn more here:

### **Job Requirements**

#### **Minimum Qualifications**

- Enrolled in a Bachelors, Masters or PhD program in Computer Science and/or Software Engineering
- Solid C++ and Object-Oriented programming skills
- Ability to work as part of a team, self-motivated
- Strong problem-solving skills

#### **Preferred Qualification**

- Familiarity with the Agile process
- Strong math (linear algebra) skills
- Experience with Git or similar source code revision control systems

**Citizenship Requirement**                  N/A

## **APPLICATION INFORMATION**

**Application Procedure**                  Through Employer Website

**Cover Letter Required?**                  Optional

#### **Special Application Instructions**

**Please click the "I intend to apply to this position" button on SCOPE and also submit your application via the employer's website.**
