Job Title: Mobile Software Developer Co-op (4 months)

Job ID: 2025-70121

Company Overview

Intuit is the global financial technology platform that powers prosperity for the people and communities we serve. With approximately 100 million customers worldwide using products such as TurboTax, Credit Karma, QuickBooks, and Mailchimp, we believe that everyone should have the opportunity to prosper. We never stop working to find new, innovative ways to make that possible.

Job Overview

At Intuit, we believe in the power of early talent. Our internship and co-op program provides hands-on experience, mentorship, and opportunities to contribute to real-world projects that impact millions. We get up every morning with our hearts beating fast, driven by the knowledge that we're transforming the world of consumer and small business finance. It's why our products continue to resonate with 50 million consumers around the globe. We are a Fortune 500 fintech company, and Canada's Best Places to work several years in a row.

Our Consumer Group Design System team is at the forefront of crafting the intuitive and impactful experiences our customers rely on every day. We're responsible for building and maintaining the Server Driven UI library that powers a consistent, functional, and delightful user experience for TurboTax, across platforms (iOS/Android/web). We work collaboratively to innovate, iterate, and deliver high quality experiences directly into the hands of millions.

Intuit values the fresh perspectives and innovative ideas that early talent brings. Join us and contribute to projects that shape the future of financial technology!

Responsibilities

What You'll Do:

- **Build and Implement Cross Platform UX:** You'll assist in designing, developing, and testing new UI components, prototypes, or proofs-of-concept for our iOS/Android applications.
- **Contribute to Project Planning:** You'll learn to gather functional requirements, develop technical specifications, and assist with project and test planning alongside experienced team members.
- **Uphold Quality Standards:** You'll participate in our quality processes, including peer reviews of estimates, designs, and code, learning what it takes to build robust mobile applications.
- **Document and Share Knowledge:** You'll help create technical documentation that communicates architectural and design decisions, helping to educate both development teams and business users.
- **Manage Your Contributions:** You'll gain valuable experience in managing your own project priorities, deadlines, and deliverables within a supportive team environment.
- **Collaborate and Learn from Cross Platform Domain Experts:** You'll be collaborating with domain experts across Web/iOS/Android, gaining valuable exposure to a wide breadth of technical knowledge, and building your professional network.

Job Requirements

Qualifications

What You'll Bring:

- **Mobile Development Foundations:** Strong familiarity with the mobile ecosystem for development, testing, debugging, and performance.
- Knowledge of mobile architectural patterns like MVC or MVVM.
- Familiarity with the app publishing process
- Cross platform experience is a strong plus but not required
- **Core Software Skills:** A solid grasp of Object-Oriented Design (OOD), experience with building accessible and performant UI.
- **Development Practices:** Experience with Git and an appreciation for quality practices like automated testing and test-driven development (TDD).

Eligibility Requirements:

- Actively enrolled in a post-secondary education program.
- A graduation date at least 4 months after the co-op term ends.
- Available for a 4-month co-op work term for 40 hours per week
- Must be legally eligible to work in Canada for the duration of the co-op term, without requiring sponsorship now or in the future.
- Ability to work in our Toronto office a minimum of 3 days per week.

Citizenship Requirement N/A
