Placement Term	2026 - Winter
 Job Title 	W26 Software Engineer (Co-op) 175297
Position Type	Co-op Position
Job Location	Vancouver, BC
Country	Canada
Duration	4 or 8 months
Salary Currency	CAD
Salary	20.0 per hour for 0 Major List
Job Description	

Location: Greater Vancouver Area (In-Office)

D3 Security is transforming SecOps with **Morpheus**, our AI-driven Autonomous Security Operations Center (ASOC) platform. Morpheus automates Tier 1-3 analyst work with unmatched precision, processing millions of alerts in real time and empowering security teams to respond faster and smarter. Our mission: to deliver scalable, intelligent, and integrated security operations solutions for the world's most forward-thinking organizations.

The office is located in beautiful downtown Vancouver next to Burrard Skytrain Station, offering a friendly environment with an energetic, forward-thinking team.

We are seeking a **Software Engineer (Co-op)** to support our frontend development team. This is an excellent opportunity for a student or recent graduate to gain hands-on experience working on production-level UI features in a collaborative and fast-paced environment.

Responsibilities

- Assist in the development and enhancement of frontend components using modern JavaScript frameworks (React)
- Work closely with senior developers to implement user interfaces that are clean, scalable, and user-friendly
- Collaborate with QA and backend teams to test and debug frontend functionality
- Participate in UI/UX discussions and contribute to improving user experience
- Write clear and maintainable code, and document your work as needed

Why do our employees choose us (and stay)?

- Gain real-world experience contributing to a cutting-edge cybersecurity platform
- Work in a collaborative, mentoring-focused environment
- Get exposure to modern frontend development practices
- In-office work offers hands-on support and better team collaboration

We are looking for enthusiastic and motivated individuals who are passionate about software development and excited to grow their skills. If that sounds like you, we'd love to hear from you!

Job Requirements

Qualifications

- Currently enrolled in or recently graduated from a Computer Science or related program
- Familiarity with **JavaScript, React, Tailwind, HTML, and CSS**
- Some exposure to **Git** and version control workflows (e.g., branching, pull requests)
- Strong interest in frontend development and UI/UX design
- Eagerness to learn, take initiative, and collaborate with a supportive team
- Bonus: Exposure to any of the following is a plus but not required:
 - TypeScript
 - RESTful APIs
 - Basic backend knowledge (Python, C#, or databases)
 - Understanding of software development lifecycle and agile processes
