| Job Description | |

About the job:

- Assist in the design and implementation of mobile applications that integrate advanced ML and NLP technologies.
- Experiment with and implement novel interaction techniques to enhance mobile user experiences, leveraging the latest advancements in ML, NLP, and LLM.

- Work closely with senior engineers, UX/UI designers, and product managers to integrate ML and NLP capabilities seamlessly into mobile applications.
- Apply strong problem-solving skills to develop efficient and effective solutions for complex technical challenges.
- Help in monitoring and improving the performance and efficiency of mobile applications, ensuring they meet user needs and industry standards.
- Stay informed about the latest trends and advancements in machine learning, NLP, and mobile technology, and suggest innovative ideas for future projects.

Job Requirements

About the ideal candidate:

- Currently pursuing a Bachelor's or graduate degree in Computer Science, Software Engineering, or a related field.
- Strong programming skills, with proficiency in Java and JavaScript.
- Familiarity with algorithms, data structures, and problem-solving techniques.
- Basic understanding of machine learning, NLP, and large language models (LLM) is an asset.
- Excellent analytical skills and the ability to learn quickly and adapt to new technologies.

- Passion for mobile technology and creating user-centric applications.

Citizenship Requirement N/A
