Introduction

A career in IBM Consulting is rooted by long term relationships and close collaboration with clients across the globe.
You'll work with visionaries across multiple industries to improve the hybrid cloud and AI journey for the most innovative and valuable companies in the world. Your ability to accelerate impact and make meaningful change for your clients is enabled by our strategic partner ecosystem and our robust technology platforms across the IBM portfolio, including Software and Red Hat. Curiosity and a constant quest for knowledge serve as the foundation to success in IBM Consulting. In your role, you'll be encouraged to challenge the norm, investigate ideas outside of your role, and come up with creative solutions resulting in groundbreaking impact for a wide network of clients. Our culture of evolution and empathy centers on long-term career growth and development opportunities in an environment that embraces your unique skills and experience.

About Business Unit:

 IBM Consulting is IBM's consulting and global professional services business, with market leading capabilities in business and technology transformation. With deep expertise in many industries, we offer strategy, experience, technology, and operations services to many of the most innovative and valuable companies in the world. Our people are focused on accelerating our clients' businesses through the power of collaboration. We believe in the power of technology responsibly used to help people, partners and the planet.

Your role and responsibilities

As a Developer Intern at IBM, you'll work with clients to co-create solutions to real-world challenges by using best practice technologies, tools, techniques, and products to translate system requirements into the design and the development of customized systems.

When working in this abstract, fast-paced and continuously changing tech world, resilience, commitment, and curiosity serve as the foundation for success as an IBM Developer.

You will participate in many aspects of the development lifecycle, such as design, code implementation, testing, and support. You could also become a contributor within Open-Source communities across multiple disciplines.

In your role, you will be supported by mentors and coaches who will encourage you to challenge the norm, investigate ideas outside of your role, and come up with creative solutions resulting in ground-breaking impact for the wider business, our external clients, & their customers. Our culture of flexibility and freedom are pillars that embrace long-term career growth and learning opportunities in an environment that highlights your unique skills and experience.

Job Requirements

This position is open to applicants who reside in Toronto or Montreal and is open to applicants seeking an 8 or 12 month internship work terms, commencing in September 2025. It is mandatory that all applicants are enrolled in full-time studies at a post-secondary institution and returning to full-time studies upon completion of the work term.
