Country	Canada
Duration	4 or 8 months
Work Mode	To be confirmed
Salary Currency	CAD
Salary	0.0 per hour for 0 Major List
Salary Range $	$3,700 to 5,000 per month
Job Description	

Description -

HP Anyware invented the PCoIP remote display protocol and developed Engineering Emmy-Award-winning Anyware products to deliver the best virtual and remote desktop experience in the world.

Our exciting growth and continuing success mean that we are looking for an energetic co-op student in their 3rd or 4th year of Engineering or Computer Science to join our Software Development team. This is an exciting

opportunity to participate in the development and testing of HP Anyware's software components for our HP Anyware family of products and to assist in modernizing our development and build environment. You will be joining a team that is building a microservices application running as a SaaS solution. As a Software Developer, you will be part of the development team in building a quality product and designing automated tests that will become part of the CI/CD pipeline of the product and enable high iterations and frequent releases with confidence.

Responsibilities:

- Development of software components related to Microservices-based solutions.
- Building scalable, cost-effective test automation with a focus on API tests, product-level integration tests and end-to-end tests.
- Integrating automated security scanning and testing into the CI/CD pipeline.
- Contribute to integrating automated testing into the CI/CD pipeline.
- Be an active member of a Scrum team and learn about agile software development.

- Learn about the DevOps culture (development and operations of a SaaS solution).
- Testing of developed components within a virtual desktop infrastructure.
- Software development in NodeJS (TypeScript, JavaScript) or .NET
- Software development for test automation in Python and Terraform.

Other Information:
- Preference will be given to Co-op Students currently enrolled in an Undergraduate program.
- Please upload a copy of your unofficial transcript with your application.
- 4-month or 8-month (preferable) work term
- Start date: Jan 2026
- Full-time with the possibility of extension and/or permanent career position

Job Requirements

Requirements:
- Students enrolled in a Bachelor's or Master's program in Computer Science, Computer Engineering, Software Engineering or equivalent.
- Students who have completed at least 2 academic years.

- Students who love to program software (ideally before they join university) and have an interest in software services.
- Students who have experience with cloud environments, such as Amazon Web Services, Microsoft Azure or Google Cloud Platform.
- Individuals who work well with others, think outside the box and see raising the bar as part of the daily routine.

Additional Requirements:

To satisfy our contractual obligations with clients, the successful candidate will be required to pass a basic, standard Criminal Records check. You will also be required to sign off on HP's Confidentiality, Non-Solicitation and Conflict of Interest Agreement.

Citizenship Requirement   N/A

APPLICATION INFORMATION

Application Procedure   Through Employer Website

Special Application Instructions
