Job Description	

Job Title: Data Science Intern
Job ID: JR2025489157
Application Deadline: <mark>January 24, 2026</mark>
Calling all post-secondary students! Join our team of Student interns and embark on an extraordinary journey alongside seasoned professionals. Gain invaluable skills and knowledge as you dive into real-world tasks, tackle exciting challenges, and receive top-notch training. Plus, get the chance to contribute to special projects that will set you apart. Don't miss out on this thrilling opportunity - apply now and take your university experience to the next level!

Boeing Vancouver is seeking various Data Science Intern(s) for our summer internship program. The Data Scientist intern will be reporting to the Data Science Manager. This is a full-time internship opportunity that is based at our office in Richmond, British Columbia and is up to 8 months in length, starting in early May 2026.

As a Data Scientist Intern, you will have to combine the skills of a developer and a detective, drawing on a wide palette of mathematics, statistics, machine learning, and programming techniques to unravel mysteries too subtle for the naked eye. You will get to work closely with our customers, building their trust, studying their problems and business needs, and you will blend artistry with science to visualize and explain your findings and stories.

Benefits of a Boeing Internship
• Have the opportunity to take part in impactful business projects.
•Network with experienced professionals.
•Engage in a strong student network.
•Gain valuable exposure in the Aerospace industry.

Position Responsibilities:
• Work directly with an assigned mentor or a buddy.

•Work closely with our customers/stakeholders to understand their business problems.

•Conduct exploratory analyses and data set characterizations.

•Research and propose (where applicable) appropriate technology/method to address business problem.

•Execute data science and analytics project tasks.

•Coordinate internal documentation and quality reviews.

•Effectively communicate technical approach, assumptions, help needed and business outcomes to project team, analytics leadership and customers.

This position is hybrid. This means that the selected candidate will be required to perform some work onsite at Richmond location. This is at the hiring team's discretion and could potentially change in the future.

Employer will not sponsor applicants for employment visa status.

Conflict of Interest:

Successful candidates for this job must satisfy the Company's Conflict of Interest (COI) assessment process.

Additional Information:

This requisition is for a locally hired position in Canada. The employer is Boeing Canada. Candidates must be legally authorized to work in Canada. Benefits and pay are determined by Canada and are not on Boeing US-based payroll. This is not an expatriate assignment.

Starting salary will be based on year of post-secondary education completed, qualifications and experience. The range for this internship is $22.00 - $24.50 CAD hourly.

Language Requirements:

Not Applicable

Education:

Not Applicable

Relocation:

Relocation assistance is not a negotiable benefit for this position.

Security Clearance:

This position does not require a Security Clearance.

Visa Sponsorship:

Employer will not sponsor applicants for employment visa status.

Contingent Upon Award Program

This position is not contingent upon program award

Job Requirements

Basic Qualifications (Required Skills/Experience):

• Currently enrolled as a full-time student with an accredited university or college with studies in Computer Science or similar technical discipline.

•Must be at least a 2nd year or higher student with studies in a relevant program.

•Experience working with Python.

•Willing and able to work 40 hours per week during the internship.

•Must be legally able to work in Canada.

•Individual must not pose a risk for safeguarding of controlled goods.

•Must be eligible to handle US export-controlled data.

Preferred Qualifications (Education/Experience):

• Previous internship experience.

•Working towards a Master's degree.

•Domain knowledge in the aviation & aerospace industry.

•Project management knowledge (PMBOK, Agile, Kanban).

•Experience with the following technologies/methodologies:

• Natural Language Processing.

•Reliability Analytics.

•Predictive Maintenance.

•Time Series Forecasting.

*Graduates are ineligible unless continuing in post graduate studies.

Citizenship Requirement   N/A
