Job Description	

Job Requisition ID #
25WD92296

Position Overview
Autodesk is looking for a talented and motivated Data Engineer to join our Analytics team to develop robust and scalable data pipelines using and improving existing platforms.
The successful candidate will drive performance enhancements, build pipelines, and collaborate with other Data Engineering teams across Autodesk. You will work with cutting edge technologies in big data space.

Responsibilities
• Develop, automate, migrate and support robust and reliable data pipelines
• Work with the team to make the Data Platform an efficient, robust and scalable platform
• Gather customer requirements, sequence work and document technical solutions
• Interface with data engineers, data scientists, product managers and internal stakeholders
• Contribute to a team culture that values quality, robustness, and scalability while fostering initiatives and innovation

About Autodesk
Welcome to Autodesk! Amazing things are created every day with our software - from the greenest buildings and cleanest cars to the smartest factories and biggest hit movies. We help innovators turn their ideas into reality, transforming not only how things are made, but what can be made.
We take great pride in our culture here at Autodesk - it's at the core of everything we do. Our culture guides the way we work and treat each other, informs how we connect with customers and partners, and defines how we show up in the world.

When you're an Autodesker, you can do meaningful work that helps build a better world designed and made for all. Ready to shape the world and your future? Join us!

Salary transparency

Salary is one part of Autodesk's competitive compensation package. Offers are based on the candidate's experience, educational level, and geographic location.

Diversity & Belonging

We take pride in cultivating a culture of belonging where everyone can thrive. Learn more here: https://www.autodesk.com/company/diversity-and-belonging

Job Requirements

Requirements
- Hands-on software development experience in Python
- Familiar with cloud-native applications
- Customer-facing and service-oriented person
- Understanding DevOps best practices, architectures, and methods
- Familiar with scalable **data pipelines and ETL processes** for data ingestion, transformation, and integration.
- Familiar with **Relational and NoSQL databases** such as MySQL and DynamoDB.
- Contribute to **data documentation, lineage tracking, and workflow orchestration**.
- Ability to work with **cross-functional teams** (analytics, product, ML engineering) in a remote environment to deliver data for dashboards and models.

Minimum Qualification
- Must be at least 18 and enrolled in college or non-traditional education, such as coding boot camps or industry-related vocational classes and returning to school or program following the completion of this internship.
- A mix of previous internships, school projects, volunteering, and leadership experience are also important.
- Currently pursuing a Bachelor's or Master's degree in Computer Science, Data Engineering, Information Systems, or a related field.
- Solid understanding of SQL and relational database concepts.
- Familiarity with data pipeline concepts and ETL/ELT workflows.
- Basic knowledge of cloud data platforms (AWS, Azure, GCP) and distributed data processing frameworks (e.g., Spark, Hadoop) is a plus.
- Strong problem-solving skills and ability to work with large datasets.
- Eagerness to learn new technologies and collaborate in a fast-paced environment.

Citizenship Requirement   N/A
