Job Description

Introduction

A career in IBM Consulting is built on long-term client relationships and close collaboration worldwide. You'll work with leading companies across industries, helping them shape their hybrid cloud and AI journeys. With support from our strategic partners, robust IBM technology, and Red Hat, you'll have the tools to drive meaningful change and accelerate client impact. At IBM Consulting, curiosity fuels success. You'll be encouraged to challenge the norm, explore new ideas, and create innovative solutions that deliver real results. Our culture of growth and empathy focuses on your long-term career development while valuing your unique skills and experiences.

Your role and responsibilities

• You will use your experience in application development to design, code, test, and provide industry leading solutions for our clients
• You will troubleshoot any development issues reported by project teams or the clients
• You will become certified in one or more of the following cloud technologies: AWS, Azure, RedHat, IBM Cloud, Google
• You will be given the opportunity to learn updated or new technologies such as MuleSoft, Jenkins, React, Ansible, Angular, and more
• You will work in Java, Node.js or frameworks such as Springboot, React, etc

This position resides in Toronto and is a 8 months work term commencing in May 2026. It is mandatory that all applicants are enrolled in full-time studies at a post-secondary institution and returning to full-time studies upon completion of the work-term. Please note that MBA and PHD Candidates are not eligible for this program.

Job Requirements

Required education

High School Diploma/GED

Preferred education

Bachelor's Degree

Required technical and professional expertise

• You have the ability to work in an Agile, collaborative environment to understand requirements, design, code and test innovative applications, and support those applications for our highly valued customers

•You are great at solving problems, debugging, troubleshooting, designing and implementing solutions to complex technical issues

•You have experience coding and using databases

•You have basic knowledge or hands on coding experience in one or more of the following technology areas: Java, JavaScript, Python, SQL

•You have basic knowledge or hands on experience using one or more of the following frameworks/libraries: React, Springboot, Quarkus, Microservice Development, Kubernetes, Docker, OpenShift, GraphQL, Vue

•You have an excellent understanding of the software development life cycle and software testing

•You will have experience in building and utilizing Generative AI tools and resources to help with technical delivery and coding task

OTHER RELEVANT JOB DETAILS

Must have the ability to work in Canada without sponsorship.

This role will involve working with technology that is covered by Export Regulations sanctions. If you are a Foreign National from any of the following US sanctioned countries (Cuba, Iran, North Korea, Syria, and the Crimea, Luhansk, Donetsk, Kherson, and Zaporizhia regions of Ukraine) on a work permit, you are not eligible for employment in this position.
