Job Description	

Job Title: Software Engineer - Intern
Job ID: R00569
Job Description:
In Q4 2023, Intel® announced Altera® will be reported as a separate business unit beginning on January 1, 2024, with ongoing support from Intel®. This position is associated to that standalone business strategy and is expected to fully transition to a standalone company at some time in the future. The Programmable Solutions Group (PSG), within Intel®, will continue to drive the future for FPGAs and Structured ASICs (hardware and software) to build a better tomorrow. By pushing forward in cutting edge technology our work is at the heart of innovation. With a career at Intel®, you have the opportunity to shape the future for everyone. Intel® Toronto's research and development facility employs some of the city's most accomplished technologists and we offer among the best compensation packages in the industry. Intel® is a company of bold and curious inventors and problem solvers who create some of the most astounding technology advancements and experiences in the world. Do you love to solve technical challenges that no one has solved yet? Do you enjoy working with cross functional teams to deliver IP solutions for products that impact customers lives? If so, come join us to do something wonderful.
We are looking for world-class engineers to help us build the future of technology.
We are looking for someone that brings:
• Excellent technical skills.
• Excellent communication skills.
• Works well independently and develops quick engineering solutions for complex problems.
• High problem-solving skills and good tolerance for ambiguity.
• Knows how to prioritize tasks independently.
• Focus on quality, discipline, and accurate results for engineering customers.
• Contributes and works well in a multi-site team setting.
Job Type:
Student / Intern (Fixed Term)

Shift:
Shift 1 (Canada)
Primary Location:
Bloor St 1
Additional Locations:
Posting Statement:
All qualified applicants will receive consideration for employment without regard to race, color, religion, religious creed, sex, national origin, ancestry, age, physical or mental disability, medical condition, genetic information, military and veteran status, marital status, pregnancy, gender, gender expression, gender identity, sexual orientation, or any other characteristic protected by local law, regulation, or ordinance.

Job Requirements

Qualifications:
Relevant experience can be obtained through schoolwork, classes and project work, internships, military training, and/or work experience.

Minimum Education:
The candidate must be pursuing a bachelor's degree in computer engineering, electrical engineering, engineering science, computer science, mathematics, or similar.
• 3+ months of experience or coursework in one, or more, of the following: C/C++, Python, digital logic, FPGAs, Verilog, or similar.

Citizenship Requirement   N/A
