Job Description

Job Title: IT QA Mobile Testing Co-Op (Winter 2026)
Job ID: 2025-21616
Get ready for a Naan-Traditional placement experience!
We're not your average bakery. We're a team of passionate thinkers and doers that are challenging the idea of what a bakery can be. We operate like a startup, powered by creativity and a 'roll up your sleeves' mentality, to give our customers the best possible product

Job Summary
We are seeking a motivated IT QA Mobile Testing Co-op to help us ensure the quality and reliability of our products. You will work with experienced QA engineers and developers on real features for mobile applications and data pipelines. In this role you can expect to learn test design techniques and practical risk-based testing, as well as mobile testing on Android including device set up andlog collection. This is a hands-on role with clear mentorship and plenty of learning opportunities.

Key Responsibilities
• Design and execute test scenarios for mobile applications and data flows with guidance from the team
•Build and maintain a simple manual regression suite that covers core functionality
•Reproduce, document, and track issues with clear steps and expected results
•Validate analytics and telemetry events against acceptance criteria
•Write basic SQL queries to verify transformations and data integrity
•Contribute small automation tasks as you ramp up, such as adding to existing Appium or
•Selenium checks

•Participate in standups, reviews, and planning, sharing test results and risks
•Learning opportunities in basics of automation frameworks such as Appium or Selenium
•and Data validation for ETL and analytics use cases
•Effective bug reporting and collaboration with product and engineering

Job Requirements

Key Qualifications
• Currently pursing post-secondary studies in Computer Science, Software Engineering, or related field
•Comfortable writing clear test steps and reporting results
•Familiarity with mobile apps and basic debugging concepts
•Basic SQL knowledge or willingness to learn
•Familiarity with Jira, Git, Android Studio, Postman, and Basic SQL
•Strong attention to detail, curiosity, and communication
•Exposure to Appium, Selenium, or a unit test framework such as JUnit or pytest is an asset
•Experience with Postman or similar tools for API testing is nice to have
•Familiarity with analytics validation and exposure to Databricks, Spark, or data pipeline testing is considered an asset
In compliance with Ontario's Bill 190, we confirm that this posting represents a current, existing vacancy within our organization

Citizenship Requirement   N/A
