Job Description	

Company Description

At General Dynamics Mission Systems-Canada, we develop innovative products and solutions that make platforms smarter - enhancing security, safety, and operational advantage while protecting nations and strengthening communities. Here, your work matters. Every day, you'll contribute to projects that strengthen national security and advance technological capabilities.

Job Description

We are looking for a co-op student to join our dynamic team where every day brings challenges and opportunities to learn new skills and make a positive impact. You will work in a fun, fast-paced, and collaborative environment helping to develop and deploy infrastructure and engineering applications to our user community. You will work alongside experienced professionals eager to share their knowledge and help you succeed.

We have a focus on deploying well-designed solutions that are maintainable, secure, and well-documented, with an emphasis on automation and DevOps best practices.

Your Day to Day Will Include

•Building and maintaining virtual environments to host our solutions and support the team

•Deployment of applications and services, including integrating them together

•Updating and expanding applications to provide users with new features or improved processes.

•Writing scripts or tools, automating tasks such as setup, provisioning, environment monitoring, data collection, and reporting to name a few

•Evaluating new tools and technologies to improve the way we work

•Developing, streamlining, and communicating processes and best practices

Additional Information

Compensation

The expected hourly rate for this position is $23.08 - $32.41. Final compensation will be determined based on an assessment of the candidate's qualifications, including relevant experience, technical and non-technical skills and internal equity. As part of student placement, you will be eligible for quarterly pay increases.

Why Students Love Working Here

• **Purposeful Innovation & Problem Solving:** You'll work alongside experienced professionals and some of the brightest minds in the defence sector, gaining hands-on experience with next-generation technologies. This is a place where your ideas are encouraged, creativity is valued, and you'll be supported as you learn and help drive modern, practical solutions.

•**Connection & Mentorship:** Through onboarding to your career journey with us, you will work with teammates that are excited to share their experience and develop your skills. Have meaningful interactions, ask questions, and build relationships that can lead to lasting industry connections.

•**Perks & Highlights:**

• Eligibility for future co-ops or full-time roles

•Flexible work hours and compressed workweek options

•Hybrid work model (where applicable)

•Networking opportunities across teams and disciplines

•Onsite amenities and social events (gym, bike storage, trivia, appreciation events, etc.)

•Corporate discounts

Accommodation

If you require accommodation during any stage of the application process, please contact Human Resources via recruitment@gd-ms.ca.

Job Requirements

Qualifications

Essential Qualifications

•Currently pursuing a Bachelor's degree or College Diploma in Engineering or Computer Science

•Experience working with scripting languages such as Python, Bash, or PowerShell

•Experience working with JavaScript or TypeScript

•Fundamental understanding of Server and Desktop Operating systems

•Love working in a team environment, collaborating, and sharing your knowledge

•Ability to analyze complex issues, develop and recommend options, and implement solutions

•Good communication skills, both written and verbal

Team Impact

•You will bring to our team your enthusiasm to contribute, a willingness to learn new skills and tools, and your strong sense of ownership, as well as your disciplined approach to solution development.

•You won't be afraid to ask "why are we doing things this way?" and "how can we make it better?"

Nice to Have

•Experience working in a git environment with a modern IDE or directly on the command-line

•Experience working with C#, ASP.NET, and Angular.

•Practice working with Linux and/or Windows operating systems

•Any knowledge of VM environments or containerization tools like Docker

It is a requirement that General Dynamics Mission Systems-Canada be registered with the Canadian Controlled Goods program and that all of its workforce be security assessed. Successful applicants must meet all applicable security requirements, including but not limited to the ability to obtain and maintain a Canadian government security clearance. Applicants may be required to meet additional security requirements in order to gain access to technical data, classified areas or information that is subject to international regulations. You must be eligible to work in Canada.

Citizenship Requirement   N/A
