Introduction

At IBM Developer Skills Network, we engage closely with all business units of IBM, academic institutions, and customers large and small. As part of our open source mission, we work closely with various open source communities as both contributors and users. We containerize and orchestrate at scale, apply machine learning, AI, and blockchain, and everything else that's cool and new.

We make bets about what's coming next, not just what is popular today. We are looking for someone who is not afraid of learning new technologies quickly and applying them to implement creative solutions to scaling and service reliability problems.

Candidates with a strong data engineering background, instead of a more traditional web development profile, will also be eligible/considered for this position.

We offer a great working environment with the latest tools and the smartest people. You'll have ultimate flexibility in choosing technologies. We guarantee continuous learning at the cutting edge of everything tech. By joining our team, you will establish your eminence in the industry.

This is a long-term internship designed to help you achieve your potential and shape you into a fully-fledged software developer.

Your role and responsibilities

This position resides in Markham, ON and is a 16 month work term commencing in **January 2026 or September 2026**. It is mandatory that all applicants are enrolled in full-time studies at a post-secondary institution and returning to full-time studies upon completion of the work-term.

As a Software Developer for the IBM Developer Skills Network, you will have the opportunity to work on the design, development, deployment, and maintenance of a large-scale content syndication and learning management system that is deployed across four continents and several data centers, impacting millions of people worldwide. In addition to your software development responsibilities, you will be tasked with creating tutorials and demos aimed at such an audience of millions of developers worldwide.

If you have ever wanted to help build something akin to the Apple App Store or Google Play Store but for education, this is your opportunity. We are looking for someone who is passionate about technical writing and competent in software development, regardless of the number of years of experience.

Job Requirements

Required education
High School Diploma/GED

Preferred education
Bachelor's Degree

Required technical and professional expertise
Experience in:
* Python or Ruby.
* JavaScript.
* Database management systems;
* Basic *nix commands (e.g., grep);
* REST APIs;
* Excellent command of the English language (especially in written form);
* Must be eligible to work 16 months starting in January.
Preferred technical and professional experience
Familiarity with:
* AI, particularly LLMs.
* Containers and technologies such as Docker and Kubernetes;
* Web Security;
* Registered in a formal co-op/internship program.
Must have the ability to work in Canada without sponsorship.
This role will involve working with technology that is covered by Export Regulations sanctions. If you are a Foreign National from any of the following US sanctioned countries (Cuba, Iran, North Korea, Syria, and the Crimea, Luhansk, Donetsk, Kherson, and Zaporizhia regions of Ukraine) on a work permit, you are not eligible for employment in this position.
Citizenship Requirement　　　　N/A
