Job Description

Req ID: R-0000156884
What is the opportunity?
The Commercial Distribution Model and Advisor Role Strategy (CDMARS) Insights & Analytics team enables use of data in strategic decision making, measures / monitors key initiative impact, leads process automation / optimization, and executes ad-hock data-related requests. CDMARS Insights & Analytics Intern will contribute to this mandate, responsible for supporting and conducting analysis, design, and implementation of data solutions, leveraging RBC's enterprise suite of analytical tools.
What will you do?
• Support and conduct analysis, design, and implementation of data solutions, leveraging RBC's enterprise suite of analytical tools
•Support with defining / implementing data governance, security, and integrity / accuracy of data in model development
•Support with the implementation and maintenance of models
•Build relationships and collaborate with the CDMARS Insights & Analytics team and other key business partners
What's in it for you?
We thrive on the challenge to be our best, progressive thinking to keep growing, and working together to deliver trusted advice to help our clients thrive and communities prosper. We care about each other, reaching our potential, making a difference to our communities, and achieving success that is mutual.
• Leaders who support your development through coaching and managing opportunities.
•Ability to make a difference and lasting impact.
•Work in a dynamic, collaborative, progressive, and high-performing team.
•Opportunities to do challenging work and make a difference.
•Opportunities to build close relationships.
Job Skills

Communication, Computer Literacy, Detail-Oriented, Interpersonal Relationships, Listening Effectively, Personal Development, Personal Initiative

Job Requirements

What do you need to succeed?

Must have:
• Experience with big data technologies and familiarity with range of data tools (Big Data Tools, Datameer, Teradata, SQL);
•Experience with data manipulation with Python ecosystem (Pandas, Numpy, PySpark, etc.)
•Experience with maintaining existing and creating new ETL infrastructure
•Ability to perform complex data analysis on large volumes of data, and to translate technical data findings into clear business friendly insights;
•Excellent analytical and problem solving skills, as well as keen eye for detail to support team with QA reviews
•Interest in the financial services industry

Nice-to-have
• Experience building automated solutions using different tools combined (Python, SQL, Excel, Tableau, PowerBI)
•Business Intelligence and Visualization tools experience (Tableau, Datameer, PowerBI)
•Data pipeline automation experience with Spark.

Please note: This posting is for a **8-month Student Summer 2026** placement with a start date of May 2026 and end-date of December 2026.
In order to be eligible for this 8-month Student position, you must either:
• Be returning back to school after the work term end-date of December 2026; or
•If you are not returning back to school (i.e. are graduating in April 2026/August 2026), but you require the work term as a mandatory component to in order to graduate successfully.

Please ensure that you meet these eligibility requirements **before** applying - candidates who apply but are found to be ineligible are not able to be considered.

Citizenship Requirement   N/A
